

# WASTE MATERIALS TRUCK-TO-RAIL TRANSLOADING

SERVING MASSACHUSETTS, RHODE ISLAND, NEW HAMPSHIRE, AND CONNECTICUT

The Grafton & Upton Railroad and Seaview Railroad are pleased to offer companies contaminated soil rail shipping and transloading capabilities at three strategic locations serving the Southern New England region. Our knowledgeable staff and access to logistics partners will work to help meet the needs of your next challenging disposal project needs.

The transloading sites are located within existing rail logistics facilities allowing for immediate, hassle-free start-up of operations. Each site offers 5+ acres of transloading/lay-down space and multiple rail car spots. Our railroads also have property within our logistics hubs available for long or short-term lease for companies looking to set up their own custom transload operations.

Both railroads offer 5-day/week service ensuring that you will always have railcars available when you need them. We connect to CSX, offering shippers access to disposal sites throughout its system. Our customers can also take advantage of all of the services available through ShipCSX.

- Three strategic locations: Hopedale and Milford, MA, North Kingstown, RI
- Quick and easy start-up for any transloading operations
- Long and short-term sites available for companies to needing set up transloading operations for specific projects
- All locations benefit from CSX connections and ShipCSX services
- Open top gondolas and containers on flatcars/articulated intermodal cars
- Truck-to-railcar ramps
- Easy highway access (1hr or less trucking times) to the Metro Boston area
- Logistics partners available to assist in transloading
