Crystal Instruments designs, produces, sells, and services hardware and software for machine vibration monitoring, dynamic measurement and environmental testing.

Dataforth is a worldwide innovator of signal conditioning, data acquisition, and data communication products. 5B, 7B, 8B and 9B modules and backplanes.

Endevco is the leading designer and manufacturer of dynamic instrumentation for vibration, shock and pressure measurements.

Vibration testing systems with air-cooled power amplifiers, slip tables with long-stroke options and 3-axis testing systems. Environmental chambers with temperature, humidity, and combined temperature, humidity and vibration.

High Performance DAQ Systems specializing in transient recorders, data acquisition systems and high resolution Digital Oscilloscope products for a variety of applications and markets.

IMI, a division of PCB Piezotronics, is a global designer and manufacturer of industrial vibration monitoring instrumentation such as accelerometers, vibration transmitters and switches.

IRISS focuses on what we do best by continuously improving infrared (IR) window, online monitoring devices and Ultrasound test equipment technology.

Larson Davis core competencies include sound level meters, human vibration meters, dosimeters, calibrators, audiometric calibration systems, microphones and acoustic test systems.

High resolution, high performance non-contact displacement, distance, position, oscillation and vibration sensors for a wide variety of applications.

Leading LiDAR 1550nm LiDAR solutions enabling both detection and classification of objects out to 250 meters. Taking the guesswork out of autonomy!

Moog Protokraft, a business unit of Moog Inc., leads the industry in developing innovative optoelectronic components and communication subsystems for harsh environments.

PCB manufactures vibration, pressure, force and strain, shock, and acoustic sensors used by design engineers and predictive maintenance professionals worldwide for test, measurement, monitoring, and control requirements. Our sensors support testing in aerospace and defense, automotive, transportation, and general R&D industries.

The most comprehensive standard offering of DC Power Supplies from 750W to 15kW with parallel capability up to 60kW. Outputs up to 1500V are available with PC interface options as well Remote Analog Program/Monitor/Control capability.

The Modal Shop offers structural vibration and acoustic sensing systems and services for various applications. We simplify testing with an extensive sound and vibration rental program, precision calibration systems, non-destructive test systems, digital sensors, and both modal and vibration shakers.

Pressure sensors including standard duty pressure transmitters, high accuracy, differential, submersible, process transmitters, sanitary transducers, and special duty pressure sensors.
