DETAILS MATTER

We are Origin Acoustics. Performance loudspeakers with a high-fidelity heritage, nearly invisible aesthetics, and a commitment to genuine acoustic beauty. We believe that astounding audio is the home's beating heart. As musicians and filmmakers have poured their souls into their craft, so have we into ours. We strive to bring you the fullest experience, as intended by their creators. The minute nuance that not everyone gets to hear, that's where we live. In the details.

CONTENTS

- 8 WHY ORIGIN ACOUSTICS?**

DETAILED

ARTICULATION

TRI-LINEAR CONFIGURATION®

We've built an authentic three-way loudspeaker for in-ceiling applications. The transducers are stacked linearly for precise imaging and elegantly hinged for an extended pivot. Perfect for creating life like sound stages from above.

ACCURATE

SOUND-STAGING

MULTI-MOTION PIVOT® (MMP®)

The secret of Origin Acoustics's superior sound staging is our patented MMP™ technology. All of our five series and above loudspeakers can pivot up to thirty-degrees. So regardless of placement restrictions, you can direct the sound right to the listener.

MINIMAL DISTORTION

VARIABLE DEPTH ABSORPTION LAYER®

Surrounding the interior baffle is a precisely molded rubberized insert. Its purpose is to absorb errant frequencies that cause phase distortion. This design enhancement ensures that our long-throw woofers and DPSD™ tweeters are used to their full capabilities.

NEUTRAL COLORATION

COMPRESSION MOLDED WOOFER BASKETS

Using the time tested and true technique of compression molding, we designed and produced woofer baskets that are both highly stable and acoustically neutral. The result is a reduction in distortion without coloration from the basket itself.

HIGH

SENSITIVITY

**X-WAVE
SURROUND®**

When a speaker cone reaches its limit of movement and comes to a hard stop, unwanted waves ripple up and down the cone. Our X-Wave Woofer Surround progressively absorbs that impact, prevents unwanted sonic distortion, and improves overall fidelity.

RESOUNDING

CLARITY

**DUAL PLANE STABILIZED
DIAPHRAGM™ (DPSD™)**

This patented tweeter design improves high-frequency performance, and prevents distortion and increases loudness. This secondary stabilization allows the driver to be crossed over at a much lower frequency resulting in improved dispersion and decreased distortion.

TOOL-LESS MOUNTING

NOT ALL CUTOUTS ARE EQUAL.

When it comes to the ratio of performance to grille size, Origin Acoustics' in-ceiling speakers always finish first. That's because, on average, our models have two more inches of woofer than the competitions'. We've made it possible with our tool-less mounting system. As you can see below, our woofers and surrounds begin where the other speakers are still putting their dog-ears.

Traditional 6.5" Dog-Ears and Woofer Overlay

Traditional 8" Dog-Ears and Woofer Overlay

**STANDARD CEILING SPEAKER WOOFER & DOG EARS OVERLAID ONTO
ORIGIN ACOUSTICS' SPEAKERS WITH THE SAME CUTOUT SIZE.**

DIRECTOR 10" - 6^{1/2}" LOUDSPEAKERS

The Director Collection is the culmination of 100+ years of combined experience in producing the finest sounding in-ceiling speakers. Every aspect of the Director Collection is purposed towards producing full-range high fidelity music with as little visibility as possible. Utilizing the finest materials and a unique pivoting assembly to direct the sound precisely where it is needed; these speakers become transparent points of sound in any room. Never before has this level of overall performance been available in an in-ceiling speaker.

MINIMAL OPENING LOUDSPEAKERS

The increasing popularity of smaller recessed light openings has created a huge demand for speakers that “line up” with ceiling lighting. Delivering even under the meticulous constraints of the interior design community, the Director Minimal Opening System leaves the smallest visible imprint, whether the lights are square or round, without compromising sound quality. Minified 3” Director satellites and a unique bandpass in-ceiling subwoofer line up with the lights to form a musical arrangement with spotless coverage and full-range output.

PRODUCER COLLECTION LOUDSPEAKERS

Carefully crafted with an impressive price to performance ratio, the Producer Collection is our entry-level offering that is anything but entry-level in sound quality. With five in-ceiling models there are a variety of options for any number of applications. The collection includes two dual-tweeter models producing stereo from a single speaker, a perfect solution for hallways, bathrooms and walk-in closets.

COMPOSER LOUDSPEAKERS

We designed the Composer Collection as the perfect match for our Director Collection. Across each model, the levels of performance remain consistent. This unity allows you to timbre match our in-wall and in-ceiling models with confidence. In-wall loudspeakers are perfect for ear level applications, such as home theater or music listening.

All models (aside from the CIW series) have spring-loaded dog-ears that snap into place with just a quick turn from a coin or the included guitar-pick.

MARQUEE COLLECTION

We've tasked our experienced architectural loudspeaker engineers with designing the ultimate home theater system. The result is simply stunning. The Marquee Collection will exceed your expectations in every facet. Available both with both slim on-wall and nearly invisible in-wall configurations, they are easier to install than any other home theater system in their class. That doesn't mean they won't blow you away. Between the powerful sub-woofer option, the ultra-sensitive custom drivers, and the high-pressure horn-loaded titanium tweeters, there's a fantastic home theater experience waiting for you with the Marquee Collection.

SOUNDBARS

Sound bars have become a critical element in family room and bedroom theater systems. Simple to include and easy to install, they provide a huge improvement over the internal loudspeakers in a flat panel television. Reinforced with an in-wall, in-ceiling or freestanding subwoofer they can create an impressive, full-frequency sound field.

A perfect complement to extend both the Composer and Director Collections, the new SB3 from Origin fills the need for surface mounted front channels under a flat panel. A beautiful extruded aluminum cabinet and stylish cloth grille create a sophisticated silhouette.

EXPLORER COLLECTION

We designed the Explorer Collection for ocean conditions. This means yachts, beach homes, lake homes, cabins, showers, decks, anywhere wet, anywhere cold, anywhere hot. How? An extensive redesign of select existing in-ceiling and in-wall models.

The collection was made using a reinforced plastic resin that can withstand temperatures as high as 177°C (342°F) and down to -20°C (-4°F). The crossover is coated and impermeable, all wiring is sealed, there are additional gaskets both on the bayonet ring and loudspeaker, and all hardware is stainless steel. The entire collection is also IP66-rated, so you can be rest assured of its quality.

THINFIT LOUDSPEAKERS

The ThinFit Collection mounts with less than two inches of clearance, perfect for those oh-no moments when there's a surprise behind the drywall. The multiple woven glass-fiber woofers provide a surprising amount of low-end and volume, with the clarity and musicality you expect from Origin Acoustics. Available in three designs, two for ceiling applications and one D'Appolito model for in-wall use.

ARCHITECTURAL SUBWOOFERS

While all of our in-ceiling loudspeakers deliver most bass per cut-out, often, the listener wants more, so we have three great ways to do just that. The DSUB6 and DSUB8 are for pre-construction installation, each model featuring dual woofers and a tuned, port tube, can be quickly and safely stashed in the ceiling with only a matching grille visible. Or for retrofit integrations, the powerful DBA10EX can reach impressive lows.

FLOOR STANDING SUBWOOFERS

Bass frequencies are the foundation of any audio performance. They fill the room with impact and drive emotion in every listening session. Our subwoofers deliver this dramatic and dynamic portion of the sound experience through the matching of rugged and powerful amplification with high-performance drivers. The subwoofer line is available in three sizes with 8-inch, 10-inch and 12-inch drivers powered with up to 600 watts of digital amplification.

LUXURY LANDSCAPE LOUDSPEAKERS

That time spent in your backyard, when the weather is perfect and you're surrounded by the people you love, that's the moment we designed these loudspeakers for. The high-quality weatherproof enclosures ensure that you'll always have just the right musical ambiance when you need it. Our detail-driven digital signal processing 70v Amplifiers purify your sound while providing long-range rock-solid power. And as the designers of the first luxury bollard loudspeaker, you can look and sound great in a sleek aluminum finish.

AMPLIFIERS

We offer three types of amplifiers, each with different uses to cover all types of loudspeakers and installations. The A-Series includes the A1250, and A2150. The DSP3 Series is for more demanding installations, with a dedicated subwoofer channel, even more power, and user-configurable DSP processing. Finally, the SubA Series is for making devoted, mono, passive subwoofers really shine.
