

## CowPots™ Packaging:

- As strong and protective as fiberboard
- Customizable for protection
- Made with 100% renewable and recycled materials
- Sterile & Odorless
- Made in the USA

## Benefits the environment when it is:

- made
- used
- discarded

- Eco-Friendly
  - ∞ Biodegradable
  - ∞ Compostable
  - ∞ Plantable
- Produced with green energy; bio-gas and solar power
- Zero waste manufacturing
- Reduction in landfill waste, commercial composting and recycling plants

## Protects as well as fiberboard.

In addition to the styles we currently manufacture, customization is available to meet your packaging needs.

# CowPots™

The packaging you plant!

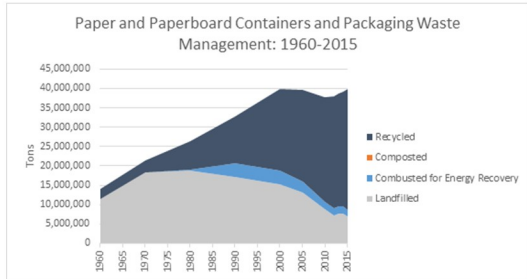

CowPots™ Packaging offers the alternative that will drive your company's environmental commitment further, with a plantable option.

Add value - *instead of waste.*

**Face the Facts:** Facts and Figures about materials, waste & recycling from EPA.

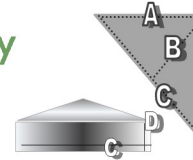

**CowPots™ Packaging** is not only biodegradable - *it is PLANTABLE* and designed to be used as a growing medium, soil amendment or added to the home compost pile.

**CC002**

A: 5 5/8" C: 8 1/4"  
B: 3 7/8" D: 2"

**CC003**

A: 5 1/8" C: 7 3/8"  
B: 3 3/8" D1: 1 3/4"  
D2: 3"

**CC004**

A: 5 1/2" C: 8 1/4"  
B: 3 7/8" D: 4"

**CC005**

A: 7" C: 9 3/4"  
B: 5.5" D: 3.5"

## Our Beginnings

Created as a value added solution for a dairy farm's byproduct, **CowPots™** uses 100% renewable and recycled post-consumer ingredients.

After 20 years of manufacturing for the horticultural industry, our unique plantable material is now being introduced to the packaging industry.

Heat treated cow manure is used to form sterile, biodegradable and plantable products which match the structural integrity, durability and protection of fiberboard products.

Instead of adding waste to the landfills, all CowPots™ Packaging materials can add valuable nutrients back into the soil by planting or composting.

**Add value - instead of waste to your packaging materials.**
