

OHR SHLOMO

Yeshiva High School

בע"ה

ערב שבת קודש פרשת נצבים-וילך, תשפ"ג

Dear OSYHS Family,

History has been made! The first week of Ohr Shlomo has been a whirlwind of vibrancy, warmth, and academic excellence. Our boys have taken our temporary residence in stride, rising to the moment - while enjoying the novelty that our short-term space offers. With Hashem's help, Ohr Shlomo students will continue to be a pride and joy to their Rebbis, teachers, and families.

Mission accepted

Going from a summer of leisure and relaxation into a structured Yeshiva schedule may not sound like a smooth transition - except in Ohr Shlomo.

Baruch Hashem, **3 students from our 11th Grade and 2 from our 12th Grade** have volunteered to join our **Gemara Honors** class. In this class the boys will aim to complete the entire Maseches Taanis this year and thoroughly 'own it'. Using modern memory techniques as well as our time-tested Yeshiva method of learning, the boys are ready, willing, and able to make this a reality. **Thank you so much to our anonymous benefactor for sponsoring the Gemaros and other necessities.**

Yeshiva Leadership

As a Yeshiva striving to embolden the future leaders of the Jewish people, it is a great source of pride when our students assert control and responsibility, helping our Yeshiva function properly. Our Gabbai Rishon and Sheni, **Shalom Reid and Yakov Telesh**, have already shown themselves to be fit for their role, and we *bentch* them with continued success. Thank you also to **Benny Gandelman** for a meticulous job leining from the Torah.

Staying fit - physically and spiritually

The demand to be healthy isn't just a slogan here, it's a Mitzvah. With guidance from our Physical Education Instructor, **Mr. Hazan**, our boys got moving. Involving everyone with delicacy and firmness, each individual student was challenged and encouraged. Staying safe in the 100+ degree weather this week, OSYHS students showed surprising stamina and energy.

United as one

This week we were tested with the Marshmallow Challenge. Equipped with only spaghetti, tape, a bag, and a marshmallow, our boys were focused on their goal - to build the tallest freestanding tower. As a team-building exercise, this gave us the opportunity to see how we can work as a unit ascending to the great heights of **כאיש אחד בלב אחד**. While the 12th grade tower was structurally complex, the 11th grade tower was an architectural marvel, and the 10th grade tower was certainly the highest - only the 9th grade tower stood the test of stability. Congratulations!

Have an incredible Shabbos!
