Subject: NHDES removes Little Island Pond Cyanobacteria Advisory

Hi All,

The cyanobacteria **WARNING (ADVISORY)** that was issued on 22 September 2023 has been REMOVED for Little Island Pond as of today, 8 November 2023. While the bloom accumulation has dissipated, NHDES advises that lake-goers look out for discoloration or surface accumulations in the future. Please continue to monitor your individual shoreline for changing conditions.

The red cyanobacteria advisory signs can now be removed from public access points.

Thank you all for your communication. If you see cyanobacteria in the future, [please report it here!](#)

*Please forward this email to other residents / community members who need this information. If they would like to be added to the email distribution list, please have them [sign up through this form](#) to be directly included on future communications from NHDES. If you prefer to no longer receive these sampling updates, simply respond, and indicate "unsubscribe".*
