- Harmful to humans & pets
- How to prevent
- Dissipate on own

submitted by Pete and Christa Bajor

Bassweed

- ▶ Found by John Patterson
 - ▶ Where on lake?
 - ▶ Non-Invasive
 - ▶ Common pondweed
 - ▶ How to harvest
-
- ▶ Official name:
Potamogeton Amplifolius

Colonial Animal - Bryozoan

- Found by John Patterson
- Not harmful????
- Size of football
- How to prevent???

Clasping Leaf Pondweed

- Non-invasive
- How to prevent
- How to harvest

- Official name:
Patamogeton Perfoliatus

Submitted by John Patterson,
Pete Bajor and Judi Habeeb,
Joost Verhofstad

Clasping leaf pondweed
(*Patamogeton Perfoliatus*)

Bladderwort

- Submitted by Joost Verhofstad
- Not invasive
- Usually floating on water
- Can just move it out of the way

- Carnivorous plant that captures zooplankton (microscopic animals)
- When in bloom has small yellow flowers

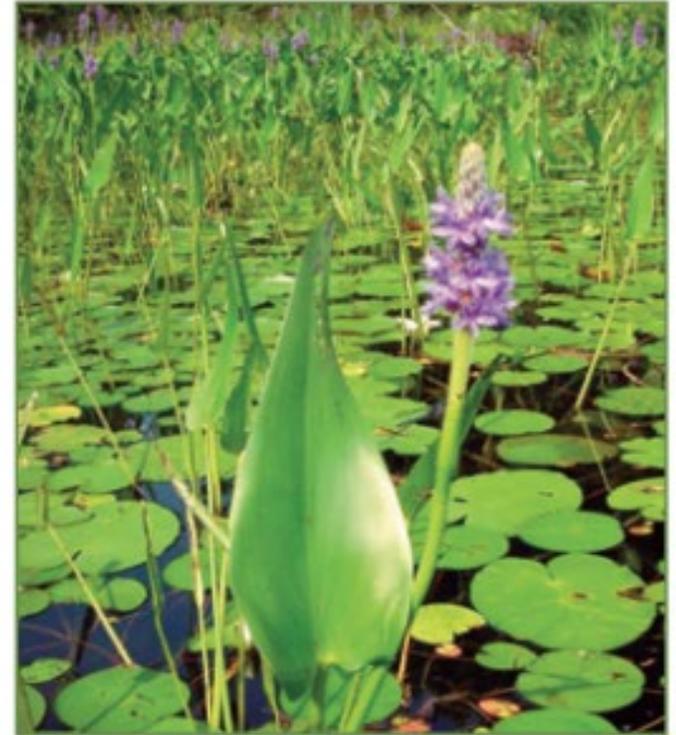

Pickerelweed

- ▶ Submitted by
- ▶ Not invasive
- ▶ Good for fish to hide
- ▶ How to harvest

Pickerelweed (*Pontederia cordata*)

This perennial emergent plant can grow up to 4' tall. The leaves are waxy and can vary in size and shape. The violet flowers grow at the end of a vertical spike

Pipewort

- ▶ Submitted by ?
- ▶ Not invasive?
- ▶ Good for
- ▶ How to harvest

Pipewort (*Eriocaulon septangulare*)

The most prominent feature of this plant is its white roots that have cross lines on them. At the end of the Pipewort's stalk there often is a button-like white flower that emerges.
