How much of the world has lagged behind?

- According to the United Nations, since 1978 a country a year has slipped down to “least developed” = 54 countries over the last 3 decades.
- Medieval practices are still alive in many parts of the world especially where the absence of education and communication technology have kept people in the dark.

World's Poorest – World's Richest

- 2 billion live on less than \$1.00 a day.
- 1 billion without access to health care.
- In Sulu, 9 out of 10 families live below the poverty level – less than \$1.00 a day.

- 3 richest on earth have assets worth more than the GNP of 50 developed countries.
- 3 people of Bill Gates MS are worth more than the combined GNP of 44 developed countries.

Financing Peace and Progress: Why Foreign Aid Fails in Mindanao

- UP Forum Vol II Number 1 Jan-Feb. 2010 – Alicor L. Panao
- “Government officials themselves admit that peace and development efforts in Mindanao cannot take place without the generosity of overseas development donors.
- “And there is a problem of defective implementation”

Prioritizing Peace Building

- 2008 Study of Japan Bank for International Cooperation – “Most donor agencies treat peace building only as their secondary goal and not as their main objective. Since peace building is political in nature and, and politics in the region is volatile, donor agencies avoid the subject. It therefore matters little if projects have no impact on the peace efforts.”
