

Air **VAXX** Vacuum & Pressure Vertical Storage Vessels

Air VAXX Vacuum & Pressure Vertical Storage Vessels are designed to Australian Standard AS1210:2010 for the efficient on-site storage of liquid waste and sludge.

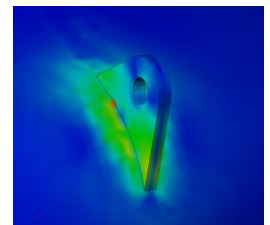

The vertical design of these storage vessels provides the smallest possible footprint for on-site storage where space is a premium. The increased height of the vessels provides additional static head pressure for improved discharge.

Air VAXX Vacuum & Pressure Vertical Storage Vessels are custom built to suit your installation requirements.

Design, built and certified to AS1210:2010. Available in sizes up to 50,000 m³ capacity.

*Designed using 3-D CAD Software &
Finite Element Analysis (FEA)*

The **Gas VAXX** Liquid/Gas Coalescer Filter
