

THE FIRST EVER!

Air VAXX-DGR HOOK-LIFT SYSTEM FOR DANGEROUS GOODS

Air & Gas Industries has developed its range of **Air VAXX-DGR** tankers to include **the first ever** Standalone Hook-Lift Liquid Waste System for Dangerous Goods.

Developed in consultation with the Queensland Government Technical Regulator, the **Air VAXX-DGR** Standalone Hook-Lift System has been specifically designed and approved to transport products classified as Class 3, 5.1, 6.1 and 8 Dangerous Goods Waste Liquids.

Celebrating **40** Years 1974 – 2014

Spoils tanks fitted to **Air VAXX-DGR** tankers are designed and certified to AS1210, Hazard Level B as required under AS4343 and have Plant Design Registration (Approval) as required by the *Work Health and Safety Act 2011*.

The **Air VAXX-DGR** Standalone Hook-Lift System is capable of carrying high density sludge liquid waste products that contain quantities of lubricants, combustible liquids and toxic or corrosive substances. Spoils tanks are third-party design verified and have Plant Design Registration (Approval) as required by the *Work Health and Safety Act 2011*.
