

AirVAXX-SVS Mud Mover Vacuum Tipper Tanker

Safer Together - Safety Vehicle Standard

Air & Gas Industries has developed its range of vacuum tankers to include the new **AirVAXX-SVS Mud Mover Vacuum Tipper Tanker** designed for full compliance with the Safer Together Heavy Vehicle Standard produced by the Land Transport Working Group of the Queensland Natural Gas Exploration and Production Industry Safety Forum (Safer Together).

The **AirVAXX-SVS Mud Mover Vacuum Tipper Tanker** is specifically designed to transport and handle high density sludge liquid waste products that contain quantities of lubricants and combustible liquids (such as drilling muds). These units have been designed for optimum road handling, employing safety controls to enhance roll over stability including: TEBS electronic rollover control, longitudinal and latitudinal tank baffling.

Spoils tanks fitted to **AirVAXX-SVS Mud Mover Vacuum Tipper Tankers** are designed and certified to AS1210, Hazard Level B (AS4343) and have Plant Design Registration (Approval) as required by the *Work Health and Safety Act 2011*.

- **Strong**
- **Dependable**
- **Versatile**
- **Built to AS1210**
- **Hazard Level B, AS4343**
- **Compliant with the Safer Together Heavy Vehicle Standard**
