AIRVAXX

Ongoing Safety and Reliability

- 15 degree tipping angle
- Vessel Capacity maximised to suit application
- Environmental Compliance QLD (ERA 57)
- Spoil tanks are certified to AS1210

The AirVAXX DT17.5-GT 4 Axle Dog Trailer is an Industrial Vacuum Pressure Tipper Tanker which operates as a commercial general waste recovery vehicle designed for single crew member operation.

Standard features include a 17500 litre vacuum/ pressure vessel which can be made from carbon steel, aluminium or stainless steel.

The unit has a hydraulically controlled full opening rear door and tipping system, including tipper locking pins.

Optional features include a Safety Handrail System which involves an air-actuated pop-up stainless steel safety handrail and side access ladder.

Another optional feature available is a non-slip walk surface on top of the vessel to allow for safe movement of the operator when on top of the trailer.

We offer numerous options and all of our tankers can be customised to suit your specific needs. Give us a call to get your next project started!
