AIRVAXX

Ongoing Safety and Reliability

- Total Height under 2 metres
- Basic Design
- AS4343 Hazard Level E
- Tough Construction
- High Vacuum Level

The AirVAXX R3-195GT Liquid Waste Road Tankers are purpose designed and built to allow for the road transport of non-harmful liquids and sludge.

With the total height of under 2 metres this low profile unit is able to be navigated under buildings.

The unit has a construction and statement of compliance to the QLD code of Environmental Compliance (ERA 57) and comply with the safety requirements for AS4343 Hazard Level E vacuum equipment.

Standard features include a 3000 litre aluminium alloy vacuum / pressure vessel with a shell thickness of 8mm, a clean out hatch with a 500 NB aluminium neck and side mounted stainless steel lid. Also available in carbon steel and stainless steel.

These tankers can be equipped with a rotary vane pumping system or liquid ring pumping system.

All of our tankers can be customised to suit your specific needs. Give us a call to get your next project started!
