

TCM COLOUR

USES

TCM Colour produce a large range of coloured pigments for use in the building and construction industry, including but not limited to concrete, mortar, bitumen, render and other applications where cementitious product is used. Our pigments are lightfast and suitable for both commercial and residential applications. Where an exact colour is essential, TCM Colour recommend that a test panel be completed using the intended raw materials and finishing techniques, the panel should then be inspected once cured.

PACKAGING

TCM Colour pigments are available in many packaging forms to suit different industry requirements, including retail packs, batch mix bags, and bulk bags. We can pack to your requirements in our Melbourne facility.

ADDITION RATES

The colours in this brochure can be produced by adding the pre formulated amount of pigment to each cubic metre (m³) of 25 MPA strength concrete. Most colours require only one bag, however to comply with OH&S, some colours require two smaller bags.

For higher strength concrete, additional amounts of pigment will be required to obtain desired results. Please contact TCM Colour for appropriate dosage rates.

Variations in colour can occur due to different cement, aggregate, slump, curing conditions or finishing techniques. Skilled applicators should be consulted to achieve the desired method of finishing, ensuring consistency of these factors will help achieve uniform colour.

Please note: Whilst TCM Colour guarantee the quality of our pigments, we cannot guarantee the colour of the final product due to the many variables that are beyond our control.

COLOUR RANGE

This brochure has a range of new colours and popular favourites. Colours appearing in previous colour charts remain available for purchase or specification. Contact us for more details. The complete range of TCM Colour pigments and products may be viewed on our website www.tcmcolour.com.au

SPECIALISED SERVICE

If you require something specially produced, our Melbourne production facility can create a custom colour to enhance the profile of your project. Our laboratory can colour match to your specific requirements, and provide packaging suitable for the application.

QUALITY CONTROL

TCM Colour pigments are produced adhering to strict quality control procedures using a unique batch numbering system.

CONCRETE SEALER

Protect and enhance your project by applying a TCM Colour concrete sealer. Clear, invisible and coloured sealers are available to compliment our range of pigments. TCM Colour concrete sealers are available in varying gloss levels including: matt, gloss and high gloss. Clear or coloured petrol resistant sealer is available and recommended for workshops.

AVAILABILITY

TCM Colour products can be distributed Australia wide; please contact us for your nearest stockist or to arrange delivery.

TCM colours represented on these cards are as accurate as printing processes allow. The colour chart and any samples supplied should be used as a guide only. We cannot guarantee the colour of the final product due to factors beyond our control.
