

The Portafill MC-8 is a compact mobile cone crusher. With a large wear resistant feed hopper, the MC-8 is designed to be fed by an excavator or loading shovel. The MC-8 features proven cone technology with excellent shape and production capacities. The overall compact nature of the MC-8 means that it is very easily transported.

Features

- Hydraulic folding hopper sides for loading.
- Metal detector for detecting metal in feed material, protecting the cone.
- Magic eye sensor to control feed material into cone.
- Hydraulic relief for uncrushable materials onto main conveyor.
- Excellent access to the engine area and other key components for maintenance and service.

Transport		Working
