"I believe we've cracked the COVID-19 code . . . This protocol can save lives."

Paul Marik, MD

Before Hyperbaric Oxygen Treatment (HBOT), a critically ill patient had been so weak, he couldn't open his eyes, but after **"He was returned to the ICU, sitting up in a wheelchair, chattering away, with his eyes wide open!"** Caroline Fife, MD

"Every substance used in our cohort is either an essential nutrient or an oxidant mediator actually manufactured by the body. Nothing foreign to the body was used, nor anything patentable."

Brownstein et al.
