Re: The Meadows Hospital Medical Center

Dear John,

It was great seeing you again and I'm so pleased that the Meadows Hospital Medical Center is becoming a reality and will soon take its' place as a very important asset serving the people of the Las Vegas community.

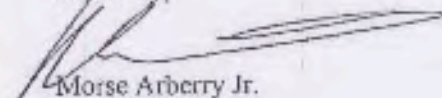

I am particularly looking forward to working with you on the Urban League Job Training Program. As you are aware, the Urban League has the expertise to assess the employment needs of the hospital including professionals such as nurses, medical technicians etc. The Job Training Program will be able to both recruit and train suitable candidates for a wide variety of job descriptions.

John, as you know, I recently attended a meeting in Washington, DC with Senator Harry Reid and his staff. We discussed the Hospital and Medical Center project in some depth. I informed the Senator that you are ready to move forward, and advised him of the projects' creation of some 3500 jobs both during and post construction. We also proposed to sponsor the Hospital project for New Market Tax Credits. We view this as important in order to facilitate a positive economic engine in a very difficult economic environment.

Having spent 20+ years of service to the State of Nevada Assembly, much of it as Chairman of the Ways and Means Committee, I expect that my positive assessment of this project will be respected, and our requests acted upon.

I will keep you informed and remain committed to the continued success of The Meadows Hospital Medical Center.

Sincerely,

Morse Arberry Jr.  
President and CEO
