Ogden's Eccles Art Center celebrates 125 years

In our August meeting director Travis Paite from the Eccles Art Center asked the Beehive A'S to participate in this 125 years celebration by bringing our cars to represent our piece of this history. This event occurred on Saturday August 25th. Ten Model A's were represented. There were tours of the mansion, food vendors, art booths, etc. so there was much to do.

*A Jerry Hancock painting of the
Eccles Art Center*

*Kirk Clause had the prime display spot
near the Eccles Art Center.*

*Ten Model A's and one 1932 Buick
were represented at the event.*

Randy Christiansen is in conversation with attendees at the art center celebration.

Under the Stars Car Show

Held Saturday August 11th at the Sunset City Park for the classic car, truck fanatics, gearheads, and those who just love the hot rodding lifestyle. Though not out of place, the Model A's and T's were represented and by request the Beehive and Salty A's were there to reassemble the shot-up rusted out 'T' parts car.

Timed 'T & A' assembly: 3:57

2nd. timed assembly with youth involvement: 4:17

Prez Message

August slowed down a little, although we had the Under the Stars Car Show and the Eccles mansion 125th birthday of which both events were well represented by the Beehive A's. We did the last Model T assembly at the Under the Stars Car Show, just off our record of 3:56 at 3:57---tons of fun.

It's time to start thinking about the nomination of new club officers, if anyone would like the opportunity of being president I'm sure there would be no objections. Past presidents are welcome to go another round if they so desire. Randy Ropeleto will be taking over for 2019 and has a lot of fun things planned.

We need to start thinking about getting some raffle items together for the December Christmas party as it's approaching fast. If you have any ideas, such as certificates for golf, car parts, restaurants or just anything, it would be greatly appreciated.

Our next meeting is going to be Monday September 10, 7:00 p.m. at the Pleasant Valley Library. See you there. Craig

Clunker Clatter

As you read this newsletter, the Yellowstone tour group is now home or on their way home from their venture to Island Park, West Yellowstone, and on into the Park itself. Forty-eight ladies and gents in 26 A's or other vehicles were expected to participate. A write up about the tour will be in the October issue of this newsletter. Check out **Norm Leishman** as he has a new still in the box engine hoist for sale. Call Norm at 801-621-4591. The Tech Talk was presented by **Ray Wheelwright** about the "designed to break or leak" water pump. He says to be careful with the original fan, if rusted it may fly apart. **Dean Murray** has invited us to his home in West Haven for a mid September backyard BBQ. Dedicated 'A' enthusiast, **Randall Christiansen** is now a 35-year's member of MARC--the Model A Restorers Club. **Eldon Flinders** won the raffle. And thanks to **Rick/Barbara Berry** for providing the after the meeting refreshments.

Eleven Model A's lined up at the August club meeting on a very hot August evening.

Some twenty-four years in the restoration undertaking is this exquisite 1924 Model T Delivery Hack by past Beehive A's 1993 Prez Kevin Fielding. It appeared on a maiden voyage run to the Under the Stars Car Show. Our compliments to Kevin for his total dedication to the project and an elegant trophy winner for sure.

A Model A future may be in their hands

*...and perhaps this sedan as well--
Craig Berry's granddaughters.*

865 E. 12000 S. Draper, Ut.

Tech Talk Tip from MAFCA

S

Patent Cures

STEERING GEAR LUBRICATION

As a suggestion, the next time you service your steering gear, fill the box with as much chassis lube as you can pump into it. Then fill in the voids with all the EP-140 gear lubricant that it will hold. Then turn the steering gear from stop to stop and then add EP-140 to the top once again.

You see, all steering gears are prone to leak with normal use. By using chassis lube you will provide a non-leaking medium that will tend to seal the leakage area while the EP-140 will provide the extreme pressure lubrication for severe metal to metal lubrication.

In other words, the grease will keep the lubricating oil on the job.

Red E. Power

Editor's Note: This is a series of "old fashioned," yet tried and proven cures for what ails your Model A.
