Vol. 1 No. 2

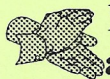

Meet Your New Treasurer

I have been asked to introduce myself to the community. My name is **Carole Bayer** and I live on Matilda. I am a Tucson transplant having been born in the Big Apple (New York, New York -- no N.Y. accent however) and spent my adult life in the San Francisco Bay Area before retirement in wonderful Tucson.

I am, or was, a Medical Technologist by profession -- having been the senior supervisor for many years at the University of California Medical Center in San Francisco. I worked in the Clinical Laboratory in the Hematology section. Presently, I am working part time as an instructor at a vocational junior college called the Arizona Institute of Business and Technology. I am teaching medical terminology and medical insurance and billing to students enrolled in medical information management and medical transcription. It is a great job that affords me the time to swim every afternoon in our beautiful Countryside Community Pool and the money to do my wide variety of hobbies -- my latest being beading.

Stop by sometime -- my unit is the one seasonally decorated including Brunhilda, the scarecrow!!!

Meet Your New Member-at-Large

My name is **Sharon Simpson** and I am the newly elected Member-at-Large for our Board of Directors. To help you put a face to my name, I am the medium-sized brown

haired lady  who can usually be seen  walking my two mopsy-looking dogs around the neighborhood.

My goal as a board member is to work with all of you toward having a safe, pleasant and attractive community. I believe that successful management of this association involves each resident taking the responsibility to follow the rules, DCC&Rs and keep their property safe and attractive. I see the Board's responsibility as the general management of the property for the good of the entire community.

I am looking forward to working with all of you in a partnership to achieve these goals.

Ruth's Tips for Feeding our Fine Feathered Friends

This is strictly FOR THE BIRDS!!!!!!! At this time of the year - say from June through September, the hot season - **do not use your feeders.** Spread

the feed SPARSLEY on the ground as the disease known as Trichomonosis is a deadly one, transmitted by the Dove, but easily picked up by the Cardinal, our rare Phainopepla, the black crested visitor we see if we *really* watch. They are there! It also affects the red hued Finch and even the Thrasher. The disease is fatal. The birds cannot swallow and when you see a body, feet up with no wounds, that's Trichomonosis. It strangles them. You can help. PLEASE do not use feeders in hot weather. *Ruth Bolen*
