## NEWSLETTER - ISSUE 4 DECEMBER 2021

Welcome to the Christmas roundup for 2021 and what a year it has been for all sorts of reasons.

Firstly, Happy Christmas to all our customers and a big thanks to those who have purchased our products throughout the year and over the preceding 4 years. I think we now have customers in every corner of the world.

This year has had some great highs but also some real low. David Combes our graphic artist died back in February of Covid-19, and this has had an ongoing issue as the two new graphic artists have not worked out which has thrown many of the instruction sheet printing programme, and then the printers went into liquidation.

The highs have been numerous.

- Trading at Scale Model World.
- 100 new products this year.
- Several articles on our products reviewed in magazines.
- Fantastic reviews.
- Our 2000 customer.
- Cooperating with several model companies with research and also artwork for future releases.

There have been a few carry overs from 2020 and (2019) which has been due to Covid issues, but we are gradually getting back on

track and there are a few new ideas for next year.

Our thanks must go to our stalwarts who have continued to perform brilliantly, Jon Freeman for his great artwork on the decals and instruction sheets, Paul Lucas for superb masters and many of our castings. Chris Baxter for new product development, 3D printing and casting. Domi Jadoul for all his wonderful masters especially the ground support sets. Greg Anderson of OzMods in Australia for casting and the use of some of his range under license. Colin Pickett for many of the helicopter masters and MP Original Masters have continued to master many of the highly detailed internal sets. Also casting by Tomas Vlach and Konrad Spale. Our success would not have been possible without you. Thank you.

Lastly, a big thank you to Ray at Fantasy Printshop and Cartograph. Ray pulled the rabbit out of the hat for the two superb new decal sheets available at SMW this year!!!

We only attended two shows this year due to the Covid restriction. As mentioned above, Scale Modelworld which was superb and thank you most go to IPMS and all their hard work and for taking the risk. Yes, numbers were down for both traders and visitors but still a great show and thank you for all the customers who welcomed

us back to the show and for so many great comments about our products. We also attended the North London Model Show in early December which was held by Guideline Publications. Again, another good model show and well organised and set up. This really is worth going to.

Next year, Coronavirus permitting, we have already booked into Scale Modelworld 2022 with a bigger stand, also booked is Milton Keynes in May. We hope to be able to attend Salisbury show and a few other if they go ahead.

The Covid pandemic is still affecting many aspects of the hobby, not least the ongoing postal problems post Brexit sending orders to Europe. Also, the UK postal system has broken down and orders can take weeks to get to UK addresses even with recorded delivery. I can only apologise for the postal problems, but they are outside of my control. I have also had Covid-19 over Christmas period, so some orders have not been sent out in some cases. We will get back to normal as soon as possible.

Lastly, we have lost some big names in the hobby this year. Mel Bromley and Mike McEvoy but there are many others. Our thoughts go out to their families. Blue Skies my friends.

Anyway, onto the exciting new products for 2022.
