Canopy Frequently Asked Questions
Canopies larger than 300 sq ft require a site visit.
Canopies larger than 400 sq ft may require a permit.
Canopies require weights. We offer concrete, water or stakes.
Canopies are subject to weather. Wind projected over 20mph may prevent a canopy from being installed. Canopies will not be set up in winds over 40mph.
Canopies require more space to set up than their measurements. For example, a 20'x20' canopy requires a 30'x30' space to be installed.
These calculations do not take into consideration buffet tables, dance floors, staging or other items that may be used inside the canopy. Please make proper adjustments based upon square footage requirements.
