

## **Mooney Method:**

15 min of reading only

- Read the synthesis for 8-10 minutes and mark it up with “C” for concessions and star(\*) the nuggets you’ll use in your argument. Remember, it’s like making a 3 egg omelette :)
- 5 minutes for doing the chicken foot for the argument FRQ
- (If you do have any time left, read the analysis w/your pen)

2 hours of writing

(You have to time yourself for the 3 FRQ’s: 40 minutes per according to Sam’s math and her dad teaches math -- auth/expertise)

- I would write my argument or synthesis first, and then write the analysis.
- (Jot down times from the gym clock and pace yourself accordingly)
