02 B2B CAR ACCESSORY WHOLESALE PLATFORM

This project features a state-of-the-art B2B platform specifically tailored for Latvia's largest Tire and Alloy Wheel Centre, extending its reach across 10 European countries.

This innovative platform offers businesses an efficient, seamless access to a vast selection of high-quality tires, alloy wheels, and other accessories. It's engineered to transform the tire sourcing process with a user-friendly interface, real-time stock updates, and personalised product recommendations.

This platform is a game-changer, designed to streamline operations, save time, and elevate the success of B2B partners.

Technologies:

The app was built using React for the frontend and Ruby on Rails for the backend.

Estimated development time:

5 months

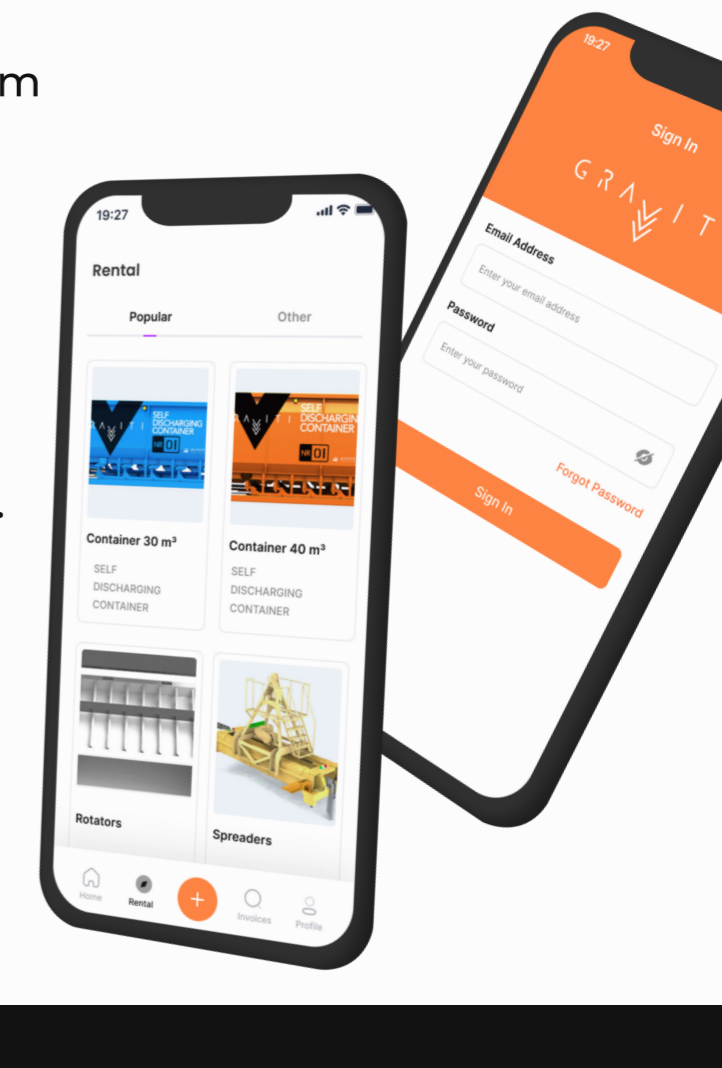

*The system is not publicly accessible, but we're happy to provide demo materials upon request!

03 GRAVITI MOBILE APP

This application will allow you to learn more about the cargo handling solution offered by GRAVITI, as well as to communicate with the GRAVITI professional team easily and quickly to receive the most suitable solution for handling your cargo.

With the help of this mobile application, you will be able to:

- Find out more about our product and how it can help increase the efficiency of cargo handling.
- Be the first to learn about the latest news in the field of cargo handling.
- Ask a question and a technical specialist, who knows GRAVITI containers "down to the last nut", will contact you directly in application chat section.
- Apply for a demonstration.
- Request an individual quote.
- Rent a loading equipment.
- Become a GRAVITI partner.

Technologies:

The app was built using Flutter frontend and Firebase backend technologies.
