

About Us

My name is Tim, the founder and president of Gorton Chimney & Fireplace. This is a company I started in August of 1980 on a dream and a dime. With a mission to treat all of my customers like family. Your safety is our number one concern! Trustworthiness in your service provider is a must! Along with integrity, quality and commitment to the safety of your family and home. We are proficient in every aspect of your chimneys maintenance and repair, from a basic cleaning or a liner installation to a complete rebuild. We are constantly keeping up to date with new codes so we can provide our customers with top notch safety and service. Most of all we are committed to respect - both among ourselves and our customers. We look forward to serving you!
