

Sensation Ride™ Chinook Classic

Regular price \$2,650.00 CAD – Call for U.S. Price

Shipping calculated at checkout.

The Chinook provides all the wonderful weight distributing features of all our other models, plus a very secure seat, while keeping weight and footprint to a minimum.

The rigging flap on the Chinook does not offer knee roll support, only keeping the rigging guarded against abrasion.

The standard options for the Chinook are western swell and western cantle.

The Chinook may be made with the western cantle that is 4" or the tall western cantle that is 4.5".

The Chinook may be made with a western swell or a swommel (round western swell).

The seat on the Chinook offers a rider a roomy, relatively flat & open cushioned zone, unless the seat is contoured with a twist orommel bolster. Comes with a smooth seat, but for that added grip, we suggest upgrading to the roughed out full seat.

Trail rings located at the rear and sides of the seats create attachment areas for cantle packs or water bottle holders for convenience on the trail. Breastplate rings are standard for attaching an English or Western breastplate and carry handle.

The Chinook is great for the trail or competition. Comfortable for both horse and rider with many options to customize your saddle to get just that right feel to spend hours under saddle with your equine partner.

***Sensation Ride™ does NOT have trial saddles at this time. Please check out our Dealer Locator Page to find your nearest Dealer. They will be happy to help you fit your saddle and find the right one specifically for you and your horse.**
