

Sensation Ride™ Classic Dressage & Dressage Trail

Regular price \$2,940.00 CAD

[Shipping](#) calculated at checkout.

The Sensation Ride™ Classic Dressage treeless saddle will fill the needs of the rider who wishes to have a deeper, wider English seat with a greater degree of contact on the knee roll. Also provides all the wonderful weight distributing features of all our other models, while keeping weight and footprint to a minimum.

The Classic Dressage model comes with two rings on either side of the pommel for breastplate use. The Dressage Trail supplies 5 additional rings for gear at the rear of the saddle.

The flap of the Dressage model is the same as the Hybrid Trail and both work well when riding with a longer leg. Offered in two different lengths, shortened and regular to best fit the rider.

The Classic seat shape provides the rider with support on the upper thigh. The Formal seat upgrade will reduce the upper thigh support and turn the Dressage model into a more show-worthy saddle. Comes with a smooth seat, but for that added grip, we suggest upgrading to the roughed out inset or roughed out full seat. The knee roll is average to full with a moveable knee block that attaches under the knee roll.

Classic Dressage/Dressage Trail are available to order in two cantle heights. Dressage that is 3" height or the upgraded Deep Dressage that is 3.5" height.

The Classic Dressage/Dressage Trail is great for the show ring or on the trail. Comfortable for both horse and rider with many options to customize your saddle to get just that right feel to spend hours under saddle with your equine partner.

**Sensation Ride™ does NOT have trial saddles at this time. Please check out our [Dealer Locator Page](#) to find your nearest Dealer. They will be happy to help you fit your saddle and find the right one specifically for you and your horse.*
