

Sensation Ride™ Hybrid Trail - Classic Model

Regular price \$2,990.00 CAD – Call for U.S. Price

[Shipping](#) calculated at checkout.

The Hybrid model offers the best of both worlds from the western and the English styles of saddles. Also provides all the wonderful weight distributing features of all our other models, while keeping weight and footprint to a minimum.

The knee roll and knee blocks combine to offer great support of the knee and upper thigh, while the western feel to the seat ensures a secure feeling. The knee roll is average to full with an optional removable knee block attached under the knee roll.

The seat on the Hybrid offers a rider a roomy, relatively flat & open cushioned zone, that is unless the seat is contoured with a twist or pommel bolster. Comes with a smooth seat, but for that added grip, we suggest upgrading to the roughed out inset or roughed out full seat.

The standard options for the Hybrid are western swell and western cantle. The Hybrid may be made with the western cantle that is 4" or the tall western cantle that is 4.5". The Hybrid may be made with a western swell or a swommel (round western swell).

Rings located at the rear and sides of the seats create attachment areas for cantle packs or water bottle holders for convenience on the trail. Front rings are for attaching a breastplate and carry handle.

The Hybrid Trail is great for the trail or competition. Comfortable for both horse and rider with many options to customize your saddle to get just that right feel to spend hours under saddle with your equine partner.

**Sensation Ride™ does NOT have trial saddles at this time. Please check out our [Dealer Locator Page](#) to find your nearest Dealer. They will be happy to help you fit your saddle and find the right one specifically for you and your horse.*
