- ALL WORK

Risk Assessment

Hazards are classified and ranked based on severity. The program identifies hazards are classified/prioritized and addressed based on the risk associated with the task. (See the risk analysis matrix outlining severity and probability).

Emergencies can arise at any time. All employees need to be prepared to use emergency equipment to mitigate injury. The inability to properly use emergency equipment places one's self and coworkers in danger.

OSHA attributes the most common fire extinguisher error to lack of familiarity with equipment.

During an emergency is to the best time to become familiar with the available emergency.
