

FIGI JÉZI

LET HOPE SHINE

Breaking Bread Together

KWIZIN KOMINITE

COMMUNITY MEALS, NOURISHMENT AND FELLOWSHIP

WHAT:

Figí Jezi's Community Kitchen provides various meals, snacks, water, juice and life saving nourishment for our employees, groups, medical patients, athletes and community members at the Community Transformation Center. By the grace of God, as the demand has increased, we have started expanding our gardens and the feeding programs to meet the needs of the community.

WHY:

Haiti has been crippled by soaring food prices, inflation and food insecurities. This has left one in five Haitian children suffering from malnourishment and some degree of muscle wasting and/or growth stunting. Community meals provide beneficial nutrients but also a sense of belonging where we can tell stories, process our day, pray and laugh together transforming our community in so many ways,

HOW:

"Many hands makes the load lighter." We are spreading awareness and building a team of faithful partners who feel lead by the spirit to make a donation or give on a monthly basis, allowing us to continue blessing our community with food, nourishment and great fellowship. If we can raise \$2,600 per month, we can continue our current feeding program, hire a new full-time chef, expand the gardens, increase the meals provided per day and add a malnourishment supplement (medikal mamba-a nutrient packed peanut butter snack) for all of our malnourished kids and the youth activity participants.
