LET HOPE SHINE

HEALTHY STEPS

Tommy Hamlin Medical

TAKING STEPS TOWARDS HEALTHY STEPS IN HAITI

WHAT:

The heart of the Community Transformation Center is the Thomas Hamlin Medical Clinic. In memory of Tommy we have started an initiative towards transforming our community by means of foot health. We have prioritized treating ailments which impair ones mobility such as wounds, lymphedema, hypertension and diabetes which all left untreated can be crippling to ones health and ability to survive. We are all inclusive, free of charge and run several clinics on a weekly basis, providing treatment, education and medications.

WHY:

Haiti has several barriers towards adequate healthcare including lack of finances, facilities, transportation, and an overall mistrust of the healthcare system. Many of our patients have been turned away from the clinics in Haiti leaving them without hope. The lack of transportation makes one rely solely on his/her feet to move around the community in order to provide for themselves. Figi Jezi has gained rapport through various activities, programs and successful patient outcomes.

HOW:

"Many hands makes the load lighter." We are spreading awareness and building a team of faithful partners who feel lead by the spirit to make a financial gift, become a monthly sponsor or donate greatly needed medical supplies allowing us to continue transforming our community. We have constructed an additional triage room, hired a local nurse, support staff and are in search for a local Dr. to join our team. Next we are raising \$16,000 to ship a container of greatly needed supplies(listed on the back) that will enable us to expand the Healthy Steps Initiative and continue transforming lives in our community.
