

# MOM & POP'S Learning Lab

## LEARNING AND OPPORTUNITY FOR ALL AGES AND STAGES OF LIFE

### WHAT:

In honor of Wanda and the late Richard Morrison we have opened up a new learning lab at the Figi Jezi Community Transformation Center in Haiti. Thanks to Teacher Telly and our four newly hired educators we were able to enhance our programs with new opportunities for our community. In addition to our youth GROW class (incorporating agriculture and growing in Christ), our Sunday youth Bible School, and our English classes we have now added additional youth and adult computer classes using Smart Box education as well as sewing classes. We utilize every class as a way to sing and pray with our students.

### WHY:

Mom and Pop's knew the value of education because of their lack of. Their advocacy and giving hearts has inspired the organization of a space where we can transform lives by providing education and knowledge to the people of Haiti. It is estimated that only 57% of Haiti's children attend school and fewer than 30% of them reach 6th grade. Our various learning activities will teach and equip with the tools necessary to be prosperous and help Haiti grow and thrive in the years to come.

### HOW:

"Many hands makes the load lighter." We are spreading awareness and building a team of faithful partners who feel lead by the spirit to make a one-time financial gift, donate needed supplies (listed on the back) and/or become a monthly sponsor which will enable us to expand our programs even further and continue transforming lives in our community through education and learning. For just \$1800 a month we can continue our current programs, open additional time slots, replenish our supply and ensure that our educators are compensated beyond their current one-year contract.
