

**Powerclean 700**

liquid paste cleaner &amp; stain lifter

**Product Data**

Powerclean 700 is a liquid paste cleaner and stain lifter specially formulated to break up stubborn grimes, surface dirt, carbon deposits, shoe markings, surface rust and hard water stains. Applicable on a wide variety of surfaces ceramic tile & grouts, mosaics, natural stones and even on glass and stainless steel without damaging its surface. Powerclean 700 can be aided with hand held polisher or with floor scrubbing machine to speed up cleaning. Powerclean 700 is an environmentally safe, biodegradable cleaner and contains no harsh chemicals. Ideal for routine maintenance.

**Method of Application**

- Always test on a small area of the surface away from the main area before actual application for surface sensitivity especially some marble which may require re-polishing after cleaning.
- Spread over area and add some water to help agitation and scrub with a white pad, steel wool pad or a brush either by manually or preferably machine aided.
- For glass surfaces, using with a polisher would be idea or if done manually scrub surface with a non scratch pad or a fine steel wool pad and work over a small section at a time, repeat until glass is satisfactory clean. Always repeat for results.
- Rinse off with plenty of clean water. Repeat wiping with dampened cloth is also acceptable.
