Affinity Depot

Affinity Depot

Affinity Depot is designed for use in businesses operating as a container storage and repair depot. The software allows the user to control and report all containers that pass through the depot, applying all the checks and creating all information required by clients.

Affinity Depot can be integrated with Affinity Estimator to allow real time updates of repair estimates and repair images.

Affinity Depot can also be integraed with Affinity Sales & Hire to provide a common access point for booking in and out containers.

Affinity Depot can be integrated with Affinity Planning to allocate repair jobs against available resources - employees/times.

Key Features

- Booking In/Out
- Repair Estimates - Coded or Freeform
- Storage & Handling Charges
- Overnight Reporting
- Real Time Gate In/Out EDI
- Movement and Stock Reporting
- Invoicing
- Labour Costing
- Financial Ledger Interfaces
- Integration with Sales & Hire
- Real Time Integration with Estimator - Including Repair Images

Affinity Depot

Sales & Hire

Affinity Sales & Hire is designed for use in businessess which purchase, sell, convert and hire containers. It can also be used for businesses which operate a self storage facility.

A single point of entry for booking out sales and on hires and booking in purchases and off hires ensures the integrity of the stock.

Customisable setup allows a variety of sales and charges to be created for invoicing.

Flexible charging structures apply to lease orders allowing individual elements to be invoiced at on hire or off hire.

Monthly lease invoicing automatically produces pdf and emails.

A full history of revenue and costs are held against the unit and full stock reporting and analysis of stock is available.

Key Features

- Sales Orders
- Purchase Orders
- Lease Orders
- Quotations
- Works Order
- Month End Invoicing
- Automatic PDF & Email
- Integration with Depot Management
- Release / Accept
- Full Reporting of Stock Status - Available/On Hired/Sold
- Live Lease Book with Filters

Affinity Depot

Costing

Affinity Costing is designed to provide full control of the use of parts and materials used for container conversions, whilst also providing the production of quotations and orders. The application also enables full visiblity of cost margins and stock.

Key Features

- Part Master
- Assemblies
- Quotations
- Automatic Costing
- Stock Control
- Stock Take
- Stock History / Movements

Affinity Depot

Plan

Affinity Planning allows the depot to accurately allocate resources (ie. employees/times) to yard work.

Customisable work time frames are setup and allocated with the ability to easily move and reallocate jobs as prorities change via a user friendly calendar .

Key Features

- Customisable Calendar
- Unlimited Employees
- Quick Job Entry
- Optional Integration with Costing/Depot Repairs

Affinity Depot

Estimating

Affinity Estimating is designed to integrate with Affinity Depot to provide real time update of Repair Estimates and Repair images.

The software can be run on tablet and via a series of drop down selections for assembly/component/damage/repair the estimate is automaticcaly coded. requiers no knowledge of IICL coding.

A 'quick' option for cleaning allows for rapid turnaround for minor damage.

Once the estimate for the unit is confirmed it is uploaded to the repair estimate together with any photographs taken.

If price scheduels are set up then the estimate will also be priced.

Key Features

- Handheld Estimating Software
- IICL Coded Estimates
- Customised Dropdown Selections
- 'Quick' Option for Cleaning
- Automatic Pricing of Estimates based on Customer or Standard Schedules
- Upload Images in Real Time to Depot Software

Affinity Depot

Depot Customer Portal

Affinity Customer Portal gives the Depot the opportunity to allow elect customers the abilirt ro view their own data in regards to stock and Accept/Release references, thus reducing the administraive overhead of dealing with requests for such information.

Key Features

- Stock Details
- Received/Despatched Containers
- Live Stock Book with Filter
- Accept & Release References
