

HOME / OFFICE / RESTAURANT / HOTEL

Ekaterina
Borovkova

The story of ADJ started in 2016. After having worked in product design for many years, the founder Ekaterina Borovkova decided to create her own line of accessories for daily life.

The ADJ initial collection of home accessories is inspired by family, evident in the logo design incorporating a symbolic triangle representing sustainability and stability. Ekaterina's children's initials - Aleksandr, Diego and Julia - are enclosed within the triangle, adding a personal element. With Ekaterina's direct involvement, the design process enhances ADJ's distinctive and captivating charm. Each item in the collection carries its own narrative and characters, influencing its color, shape and intended purpose.

Ekaterina's involvement in designing sketches, drawings and manufacturing plans is what sets ADJ apart and makes it attractive. Each item has its own unique story, determining its color, shape and purpose.

A core value of the company is a socially responsible approach to accessory design, aligned with modern environmental manufacturing standards that ensure superior quality and durability.

Manufacturing semi-finished products in Germany ensures stable and high-quality goods, while orders are assembled and packed in Italy, renowned for its craftsmanship that guarantees a high level of quality and attention to each detail.

Today, ADJ offers a broad range of fully customizable premium accessories and interior design items. These products cater to various settings such as homes, offices, private yachts and jets, hotels and restaurants. ADJ's commitment to sustainable design, coupled with its attention to details and customization options, sets it apart in the market.

Innovative material

ADJ presents a contemporary take on traditional home decoration, infusing vitality and comfort into any living space. Each product utilizes ADJ's multi-layer leather, which under-goes double-sided dyeing and a specialized anti-vandal treatment. This results in enhanced durability against wear, scratches and abrasions, while maintaining easy-to-clean proper-ties without compromising color and shape. Furthermore, these items are designed to be suitable for both indoor and outdoor home decoration.

ADJ® multilayer leather is an innovative category of leather material that has revolutionized the industry.

Confirmed by EMAS certificate [EMAS DE-104-00122](#).

This type of leather necessitates advanced high-tech production methods, resulting in a price nearly double that of traditional genuine leather. The manufacturing process involves treating the leather with pressure and using 100% natural latex as a binder. The binder material imparts elasticity and strength to the leather, while subsequent processing with natural fats and dyes enhances its performance characteristics.

The leather is produced at the oldest German factory, known for its strict adherence to regulatory requirements, health standards, and environmental norms for both raw materials and finished products. Independent laboratories in Germany regularly monitor the raw materials and products under the supervision of specialized experts.

True German leather quality to ensure the uniformity of products in thickness and their physico-mechanical properties.

Production of modified granulated leather and wood paste is environmentally friendly and uses organic materials only. It helps to preserve ecosystems and the lives of animals and trees.

Each side of a product has a different colour scheme which broadens the decorative potential of the piece and proves it versatile in any decor.

ACCESSORIES FOR HOME, OFFICE, RESTAURANT, HOTEL

ADJ products are designed to be practical and convenient for everyday family life. We prioritize sustainability, crafting items that not only enhance daily routines but also contribute to a greener future.

ADJ offers an elegant and practical line of accessories for table setting and home storage. A distinctive feature of which is the use of the material with unique properties.

ADJ IS:

- Practical design for everyday life
- The best value for money
- Reliability and durability of all products
- Top quality natural materials

It has high wear resistance to abrasion and scratches, which is extremely important for daily use of products in table setting.

Water and dirt-repellent properties make it easy to clean the surface and to get rid of stains from oil, ketchup, sauces and other aggressive products.

On both sides the material is coated with a heat-active substance that protects leather from swelling and loss of color when used in the sun and cold.

SAUCE HOLDER
protects from dirty stains from greasy and caustic sauces

The basic table setting certainly includes spices and sauces - the main culprits of dirty stains. Use of a holder for sauces and spices is an elegant solution to avoid damaging the tablecloth and the table surface.

The surface of the leather has a special treatment that protects the item from greasy and caustic food products. It is easy to clean and does not deteriorate over time.

HANGERS

ADJ, an Italian brand, takes pride in designing and manufacturing hangers for the most discerning customers. Our hangers are more than just tools for organization and storage. With a deep understanding of the importance of preserving the integrity of expensive clothing, our hangers are crafted with utmost care and precision. Each hanger is meticulously designed to provide optimal support and protection, ensuring that your cherished garments maintain their shape and beauty.

NATURALE collection, a range of hangers that exude the natural charm and warmth of real wood. However, what sets these hangers apart is their innovative construction using wood paste and hot extrusion technology. This unique manufacturing process ensures a smooth surface finish and eliminates the common issues associated with traditional wooden hangers, such as peeling and cracking over time.

From the curves, that mimic the natural slope of the shoulders, to strategically positioned notches and clips, each detail works harmoniously to provide optimal support and organization for the clothes.

Velour overlays
reliably fix clothes in delicate fabrics.

Nickel plated hook
with a safe edge will not damage the delicate fabric and will not lose its color over time.

Trousers bar - sheathed with velour fabric, to protect against slipping and jamming of ironed trousers.

Clips for skirts - equipped with silicone pads, do not leave marks on delicate fabrics and smoothly move to adjust to the size of clothes.

Natural shades of genuine cashmere create a special warmth and coziness

Hardware design

gold

copper

chrome

graphite

bronze

ADJ accessories with metal elements feature PVD (Physical Vapor Deposition) coating, which forms a protective layer on the surface, similar in hardness to sapphire. This coating protects the accessory from rust and wear while imparting an elegant and noble appearance to the products

Hangers: Hardware \ Wood paste

nickel

wenge

ivory

The wenge and ivory finishes epitomize the charm and warmth of natural wood

ADJ PRODUCTS CARE

ADJ.Style multilayer grained leather products are highly resistant to scratches, fading, swelling and to heat. However, as with any natural material, proper and punctual maintenance by following the manufacturer's recommendations is required:

! Table service products should be scrubbed with a degreaser to eliminate traces of oil, wine, sauces and tea within the day, while it is preferable to immediately eliminate traces of coffee, vinegar and acidic agents. After using the degreaser, please rinse with water until the degreaser is completely removed and dry.

! It is recommended not to wash in the dishwasher and not to leave the product on damp surfaces. In case of prolonged contact with water, it is necessary to leave the item in a dry environment for a day, placing something heavy and flat on it to avoid deformation of the surface.

! The maximum temperature allowed for contact with very hot objects is 90°C, therefore it is advisable not to place very hot dishes on the product

! It is not recommended to place heavy items on top of baskets and boxes, as this may cause them to warp.

Please use the product according to its intended purpose, avoiding extreme conditions. Please also follow these care instructions to ensure the long life of the product.
