Why is a subscription to Aloha Essentials the best move for your restaurant?

> **Direct integration with third-party delivery** marketplaces to grow revenue and improve the customer experience

> **Cloud-enabled mobile alerts and reporting** so you can monitor everything anytime, anywhere

> **Mobile POS and conversational ordering** that supports contactless mobile payments, reduces order inaccuracies and helps turn more tables

> **Secure payments with EMV** to reduce liability from potential chargebacks

> **Cloud-enabled system configuration** that allows updates like menu changes to be managed centrally and pushed to all your sites automatically

> **Contactless ordering and payment capabilities** to drive a safer, more convenient dining experience for guests

> **Online ordering for guests** to place digital orders within an inviting, branded experience

> **Stored value and loyalty programs** that drive revenue and build repeat business

> **Keeps your hardware and software current** so you can take advantage of the latest tech innovations

Gain the ease and flexibility you need to adapt to anything.
Upgrade to Aloha Essentials today.

Tabit MobileFirst
Restaurant Operating System

Tabit develops best-in-class, cloud-based solutions to help restaurants transform their business to be fully mobile, more efficient, and more profitable, while increasing customer satisfaction. Tabit is built to help restaurants protect their profit margins, creating a technology shield that safeguards against inflated transaction and processing fees.

Tabit's MobileFirst Restaurant Operating System was designed from the ground up to be truly mobile. It has restaurant point-of-sale and back office functionality at its' core and utilizes tablets and smartphones as the primary touch points, eliminating the need for static server stations. The friendly interface uses familiar swipe and tap gestures that mobile users are accustomed to for intuitive everyday use, and easy training. Tabit's 360-degree integrated ecosystem enhances the customer experience by connecting and bringing efficiencies to every interaction point.

MobileFirst – TabitPad devices allow staff to bring the point-of-sale to the point of sale: table-side.

Upsell Opportunities – Built-in sales tools help servers increase guest spend and enhance customer experience, all while enabling faster table turns.

Operational Efficiencies - Tabit solutions communicate with each interaction point driving efficiency and freeing up staff and management to focus on selling and guest experience.

Customer Loyalty – Delight your customers, build your brand, grow your customer base, and drive repeat business.

Real Time Data Access – TabitChef is a browser and mobile app enabled system providing real-time reporting of KPI's that are vital for operations management, keeping leadership always up to date.
Cloud Based – Tabit's cloud-based solution gives you access to data and analytics from anywhere, anytime.

Online Ordering, Takeout & Delivery - Tabit solutions allow you to adapt to COVID conditions quickly so restaurants can sell online and provide takeout, curbside pickup and delivery services.

Contactless Functionality – Tabit provides COVID-19 relevant solutions including contactless menus, ordering, and payments.

Business Intelligence & Data Analytics – Get actionable intelligence and key business insights such as specific menu item sales, labor costs, and overall performance to find opportunities for improvement and growth.

Focus on Guest Experience – The Tabit restaurant ecosystem focuses on enhancing guest experience resulting in higher customer satisfaction and loyalty.
