

INDICAID[®]

COVID-19 RAPID ANTIGEN TEST

INDICAID is a non-invasive, rapid point-of-care diagnostic tool that is the simplest, quickest, and cheapest method of detecting the SARS-Cov-2 antigen in individuals.

INDICAID's portability, ease-of-use, and capability for self-collection and batch testing also make it one of the most efficient ways to screen populations en masse.

WORKFLOW

INDICAID[®] ADVANTAGE

■ EASY

- User friendly testing, no equipment, or training required

■ FAST

- Visual results in just 20 minutes

■ AUTHORIZED

- US FDA Emergency Use Authorization (EUA) and CE marked

■ SIMPLE

- Intuitive process for self collected shallow nasal samples

■ CONVENIENT

- Allows sample batch collection and bulk testing

BATCH COLLECTION AND BULK TESTING

INDICAID's advantage over its competitors is the practicality of self-collection, the comfort of anterior nasal swab, and the functionality of batch-collection with (individual) bulk testing, up to two (2) hours after collection.

CLINICAL PERFORMANCE

The US FDA has extended their emergency use authorization (EUA) for the INDICAID COVID-19 Rapid Antigen Test to cover serial testing for asymptomatic individuals in a recent update. The update extends the use of INDICAID as a screening test, providing an additional accurate and reliable testing option for schools, workplaces, and communities.

“It busts the myth that antigen tests could only detect symptomatic patients and shows that high-quality antigen tests can be sensitive, accurate, and reliable to be used for population screening.”

89.1%

New Sensitivity

*Product performance against new variants are evaluated on an ongoing basis.

QUALITY CONTROLS

These controls assure users that the device is performing within its product specifications.

- **EXTERNAL LIQUID QUALITY CONTROLS:** specifically formulated and manufactured to ensure that the test’s reagents and materials work and the test procedure is correctly performed.
- **POSITIVE AND NEGATIVE CONTROL SAMPLES:** should be run once with every new lot, shipment, and each new user, using the test procedure provided

Quality control requirements should be followed in conformance with local, state, and federal regulations or accreditation requirements, and the user laboratory’s standard quality control procedures.

CONTROL PRICING

\$50 for:

- 5 x 250 single-use COVID-19 Antigen **Positive** Controls
- 5 x 250 single-use COVID-19 Antigen **Negative** Controls
