

The Water Line

Generac Mobile has been dealing with **equipment for mobile applications**, like dust control units, mobile lighting towers, and washing bays for over 25 years.

Today we are the Italian leading manufacturer and a dominant player in the European market, with a **worldwide presence** and a continuous growth throughout the years.

With a **strong experience**, we deliver pioneering and unique solutions designed for customers' need.

The **Water Line** is composed of products specifically designed to minimize the impact on the environment and reduce the waste of energy, water and time. A wide range of applications are covered by two core product lines:

Dust Fighters: for dust and odour control and suppression

Wash Racks: heavy-duty, modular wash bays with a special water recycling system.

Our products are conceived for the **rental business**, in a variety of applications, such as demolition works, mining sites, recycling, environmental repairs, mining, and construction.

Find video tutorials with step-by-step instructions on how to use our most innovative features, visiting: towerlight.com/qr

The **widest** choice of solutions for **mobile lighting, power** and **energy storages**

As international market leader, we offer the widest range of mobile products: power generators, light towers, battery energy storage systems and much more.

Our professional and innovative approach, guarantees products of unquestioned reliability and with high technical performances.

WATER

DUST FIGHTERS
WASH RACKS

GENERAC MOBILE

The Dust Fighter range

The **Dust Fighters range** is composed by different dust control units using a nebulized water system able to create water particles with a 50-150 micron diameter: these can combine themselves with dust particles with similar dimensions to drag them to the ground. Moreover, nebulized water can completely cover the dust cloud. That cannot happen using a traditional dust suppression system through a water hose: its water particles with a 1000 micron average diameter are not small enough to catch dust particles, so the water flow passes through the dust cloud without covering it completely.

The Wash Rack range

The **Wash Rack range** is a series of self-contained cleaning systems for tools and equipment that can be used at depots, outdoor or indoor. Wash Rack is specifically designed to be an environmentally friendly product: more than 98% of the water is recycled thanks to the built-in filtration system, removing oil and dirt to be disposed of correctly. Cleaning equipment means more safety of use for operators and facilitating repairs and after-sales activities of technicians and engineers.

How it works:

The water used with the Wash Rack goes into the decanter (optional), then into the filtration system to be cleaned and it's ready to be used again.

DUST FIGHTERS

DF Mini

- Horizontal range: from 5 to 8 m
- Water tank: 70 l
- Running time with water tank: from 89' to 318'
- Hand trolley
- Ideal for small indoor jobs

DF Smart

- Horizontal range: 13 m
- Mains powered equipment
- Water consumption: from 5.4 to 12 l/min
- Tilting: +10° / +50°
- Hand trolley
- Ideal for small outdoor jobs

DF Smart All In One

- Horizontal range: 13 m
- Mains powered equipment
- Water consumption: 7 l/min
- Rotation: 100°
- Tilting: +10° / +50°
- Water tank: 1000 l
- Ideal for sanification jobs

PowerJet

- Horizontal range: 30 m
- Built-in diesel engine: 6.2 kW
- High-pressure pump
- Water consumption: from 44 to 50 l/min
- Rotation: 90°
- Tilting: +0° / +40°
- Hand trolley

DF 4500

- Horizontal range: 30 m
- Vertical range: 12 m
- Max. covered area: 2590 m²
- Water consumption: 22 l/min
- Rotation: 330°
- Tilting: -20° / +40°
- On trailer (option: on base)

DF 7500

- Horizontal range: 40 m
- Vertical range: 16 m
- Max. covered area: 4600 m²
- Water consumption: 52 l/min
- Rotation: 335°
- Tilting: +0° / +40°
- On trailer (option: on base)

DF 15000

- Horizontal range: 50 m
- Vertical range: 20 m
- Max. covered area: 7190 m²
- Water consumption: 60 l/min
- Rotation: 335°
- Tilting: +0° / +40°
- On trailer (option: on base)

DF 20000

- Horizontal range: 60 m
- Vertical range: 24 m
- Max. covered area: 10355 m²
- Water consumption: 70 l/min
- Rotation: 335°
- Tilting: +0° / +40°
- On trailer (option: on base)

DF 3000 MPT

- Horizontal range: 20 m
- Water consumption: 6.25 l/min
- Tilting: -30° / +10°
- Water tank: 1000 l
- Generating set: 3.7 kW
- Manual mast (max. height: 4 m)
- On base (options: low-speed or road trailer)

DF 7500 MPT

- Horizontal range: 40 m
- Vertical range: 17 m
- Max. covered area: 4600 m²
- Water consumption: 23 or 32 l/min
- Rotation: 335°
- Tilting: +0° / +40°
- Generating set: 17 kW
- On base (option: low speed trailer)

WASH RACKS

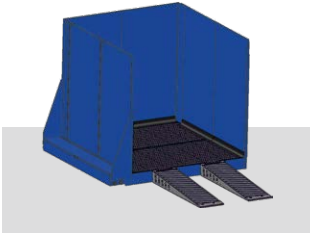

Wash Rack Mini

- Washing area: 1140 x 2850 mm
- Max. load capacity: 1200 kg
- Filtration system included (600 litres)
- Zinc-coated ramps
- All-steel structure

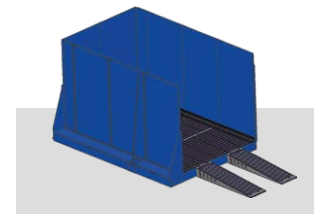

Modular Wash Rack A

- Washing area: 3000 x 2850 mm
- Max. load capacity: 15 ton
- Filtration system included (600 or 3000 litres)
- Removable zinc-coated grates

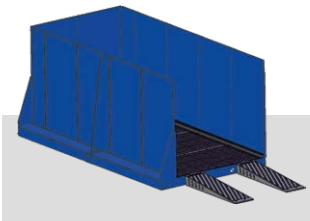

Modular Wash Rack B

- Washing area: 4500 x 2850 mm
- Max. load capacity: 15 ton
- Filtration system included (600 or 3000 litres)
- Removable zinc-coated grates

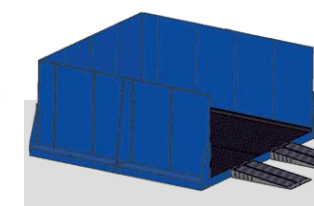

Modular Wash Rack C

- Washing area: 6000 x 2850 mm
- Max. load capacity: 15 ton
- Filtration system included (600 or 3000 litres)
- Removable zinc-coated grates

Modular Wash Rack D

- Washing area: 6000 x 5700 mm
- Max. load capacity: 15 ton
- Filtration system included (600 or 3000 litres)
- Removable zinc-coated grates

Filtration options

- Filtration tank (600 litres)
- Filtration tank (3000 litres)
- Decanter (1000 litres)

Service and Parts

A global after sales network and a wide offer of spare parts

Spare parts kit special offer

On-line spare parts order and interactive spare parts catalogues

Service support

Worldwide approved service network

Scheduled maintenance kits

Personalised solutions with 24/7 on call service

Certified operators

Dedicated training programs for users, maintenance and after sales service

Manuals and guides

A complete set of technical information, offering quick and efficient solutions

Fast parts delivery

A dedicated department with an automated storage system to fulfill 90% of orders within 72 hours.
