

EXPLORE OUR RECYCLED WOOD PRODUCTS

SOLID WOOD AND PLYWOOD

Our Products

Gremlog's recycled wood is an ideal choice for a wide range of your industrial applications. With our recycled wood, you can be confident that your industrial projects will have the strength they need while making a positive contribution to sustainability efforts. Recycled wood from construction or other sectors is used to create building materials, horse/poultry bedding, play area surfaces, panel board feedstock, paper industry, and fuel. Across industries, recycled wood is used to create valuable products that would otherwise use virgin materials to create at a higher cost. Our recycled wood offer the robustness required for such applications.

Why Gremlog ?

Elevate the performance and sustainability of your industrial projects with Gremlog's exceptional recycled wood solutions. From robust recycled plywood to dependable recycled solid wood, our products offer the strength and reliability your applications demand. Join us in building a greener future for industries, one recycled wood product at a time.
