

Prempavee.com© Ganja Cup: Quality Grading guidelines for Sub Tropical (Thailand) Outdoor Organic Ganja

General:

100 points if is a Master piece, healthy, unique, irresistible. All the parts of the flower are clean and visible. The Pistils are intact, is full, impressive, if you close the eye, you still see. The colors are the one of a lucid dream. All the trichome Crystals have intact heads brilliant, cloudy, white, amber and they contain all the times. At touch is as we like to believe the true. Is alive, transmits experiences and connections. You feel deeply in love and you happy. For these reasons of perfection, can be out and broke all the rules.

99to90 points if is amazingly attractive, rare. All the parts of the flower are clean and visible. The Pistils are intact, the structure of the bud is airy enough to let the observer able to determine if is fully healthy or not. Have no big Stick. The colors are vivid but natural (not forced with some additive), green, purple, orange, yellow. Almost all the trichome Crystals have intact heads and present brilliant cloudy white and few transparent. At the touch is as we like to be in our subjective way. Is alive and observing well transmit sense of energy and vibration.

89to80 points if is very attractive and all the parts of the flower are clean and visible. The Pistils are intact, just very few are maybe broken or missing. The structure of the bud is airy enough to let the observer able to determine if is fully healthy or not. No big stick. The colors are vivid but natural (not forced with some additive), green, purple, orange, yellow. The Crystals have most head intact and brilliant, white, cloudy, amber. At the touch is as we like to be in our subjective way. Is alive and observing well transmit sense of energy and vibration.

79to70 points if is surely attractive, if all the parts of the flower are clean and mostly visible. The majority of the Pistils are intact, some are attached to the structure. Have no big Stick unless they are serving as perfect central channel. The structure of the bud is a middle way from airy and dense. Can have rare lower tone areas but the colors are generally vivid and natural (not forced with some additive), green, purple, orange, yellow. The Crystals have most head intact and brilliant. At the touch is more or less as we like to be in our subjective way. Is very pleasant to be observed.

69to60 points if is attractive most of the parts of the flower are clean and in very nice conditions. Pistils are present. The structure of the bud is a middle way from airy and dense. Can have a 10% of lower tone colors areas but is generally well preserved and natural. Can have Stick coming out. The Crystals are well visible and at least 50% of the heads are there. At the touch is more or less as we like to be in our subjective way. Is pleasant to be observed.

59to50 points if is beautiful but nothing extraordinary. Is well clean. Few pistils are present. The structure of the bud is quite dense. Can have Stick. Can have lost a bit of color but they are natural (not forced with some additive), green, purple, orange, yellow. The Crystals are well visible at naked eye. At the touch is more or less as we like to be in our subjective way. Is pleasant to be observed.

49to40 point. The look is just acceptable. Uneasy to determine the cleaning state from even attentive external view because the structure of the bud is too dense. Color is there. The touch is acceptable but do not fully satisfy when broken or used. Crystal can be there. Can have Stick Not the best you have seen.

39to30 point. Low quality. Uneasy to determine the cleaning state from even attentive external view because the structure of the bud is too dense. Color are not as they should. The touch do not fully satisfy. Crystal can be there but they had a bad life experience. Not happy.

29to1 point. Bad. Is unclean and even present mold or bud rot. The main structure is dark, opaque, brown, black, grey, red, fake, dull. To discard.

0 point. Very Bad. Can be hazardous for health because of some chemical contaminations.

Scent: The scent does not influence the score but have to be described with max 5 words

examples: "NO SCENT" or "NO SCENT when broken WATERMELON" "NO SCENT heated or burned CAMEL" "DELICATE lemon, apple" "PUNGENT orange, pine" "STRONGcreamy, chocolate" "SOFTberry" "PERVADINGgas, grass, durian", ecc..

Effect: Because is subjective does not influence the score but have to be described. Indicate if:

- not tested / tested

- if tested: describe effect: slow/fast - relaxing/uplifting/sedative/paranoia/laugh/other – noeffect/mylevel/verystrong

Describe method: pure spliff - bong – pipe – cilum -vapo -ingested raw -ingested after activation of THC - ingested as tea - other

Smoothness: Give a score to the feeling of the inhalation only if you have smoked 100% PURE in spliff (indicate the kind of paper, rice, hemp, tree cellulose, other), bong, pipe, cilum. 100 point if is totally smooth and pleasant with nice taste 0 point if is too harsh or unpleasant, bad taste

Price. Compared with the general quality the feeling of the value compared with the price 100 very good price very good quality and experience 0 expensive price, low quality experience, not worthy

At the end will get results, for example like this:

GENERAL score: 87

SMOOTH: 90

EFFECT: Tested Pure

0.4 gr. Joint / laugh, improved creativity / my level

With Tobacco

0.1 gr. Bong / if not pure do not describe effect

PRICE: 75

SCENT: MEDIUMLEVEL, Pinapple, Green Mango
