

Radon **Kills 21,000**
Americans Every Year

1 in 15

US homes contains dangerous radon gas levels...

Every year, 24,000+ North Americans fall victim to deadly indoor radon gas. Alarmingly, radon gas has no taste, smell, or color, allowing it to silently accumulate in homes, offices, and schools. The only way to find and reduce radon gas is to install a radon monitor. By using powerful ion chamber technology, Ecosense radon monitors help you protect yourself and those you love from this invisible killer.

That is why long-term continuous monitoring is crucial — radon gas levels fluctuate by the hour, day, month, and year.
