# of Programs that met their goal, report at year end								
Barriers Encountered	<p>Barriers continue... needs for support for children's challenging behavior. Technology still a barrier for some providers. Enough time for all to work together on various needs goals. Staff, finding and keeping staff, hiring staff with experience and qualities to work with young children, turn over in Directors, onboarding and training new staff and adequate time that is needed, amount of time directors spend on schedules for staff and kids. We are trying to help reduce this barrier by different ways to support CC Center Directors. A small group of newer BH CC Directors have wanted to meet monthly so CCR&R staff have coordinated a time and date for these newer directors to come face to face and have</p>							

have coordinated a time and date for these newer directors to come face to face and have a time to network and meet bring questions and share insight with each other. We plan to continue this and hope this helps to support the retention of our child care directors in the field. Continue to hold quarterly BH Director's networking meetings for any Director to attend.

Success Stories

CC Consultant worked with a provider who was consistently over in numbers & in jeopardy of her registration being revoked. CCC created a template of a master schedule so the provider could track hours when children came & left her home. This provider is open for child care 24 hours a day 7 days a week. She was able to stay registered and track her child care hours for each child, so she wasn't over in numbers.

Consultants have been supporting programs that are working on the goal to turn in their IQ4K application. This is not a quick process, and this is a lot of time on the program's and the CCR&R staff to work together to review and meet about the necessary requirements, and work with the IQ4K Specialists in a triad of communication. Lots of back and forth to make sure the correct info is uploaded to the IQ4K online application. Program policy development required for level 1 has taken much time and focus to complete. 8 Registered child care providers met voluntarily on Saturdays in person once & virtually 3 times with Consultants to work on aligning their child care policies with Child Net 3.0 & IQ4K requirements. These providers have continued to work with CCC's on policy work and basic level business practices. It does not stop after the level is achieved ongoing and continuous quality improvement is expected to be maintained annually by the programs. So more ongoing Consultation time and support is needed. One IQ4K app for level 3 was submitted in Q3 and multiple programs are working on ongoing goals to hopefully submit in Q4.

Q3 4 new home Registration apps were submitted to HHS to be approved for a pre-inspection, and 2 completed home preinspection and received their HHS CDH Registration.
