Deflector Pulley Assemblies

The RAND Deflector Pulley Assembly is used to direct the flow of linear products in a production or warehouse environment. The pulley is adjustable vertically and angularly for the ultimate in flexibility.

Use the RAND Deflector Pulley to change the direction of your wire line, or to support the wire over long lengths. With its infinite range of adjustment, you can change the pass line height or turn it up or down.

This stand can be mounted to the floor, walls or even ceilings. **\$1150**

Universal Adjustable Telescopic Stand - \$465.00
