

## HOW TO USE VIEWPOINT FACEBOOK PAGES

### General Facebook Tips

1. Choose or update your Facebook password to make it strong.

e.g. NOT the initials of you and your sweetheart!

Use a combination of symbols, letters, different cases and numbers. Just write it down.

Concerned about privacy? All Viewpoint Facebook Groups are PRIVATE groups. Only other members of your group can see what you post. You need to join the group to

see posts. Just push the button saying "Join Group" then wait to be added.

2. How does Facebook MESSAGING work? What does it mean when someone says to "PM" them? You can easily Private Message any "Friends" on Facebook. If you are not Facebook "Friends", you can message someone but they might not see it right away (or at all). You can temporarily add someone you know at Viewpoint as a Friend in order to message them, but then delete them afterwards. Easier and safer to use your phone's texting app!
3. "Help! I've been "hacked!" No, you have been "cloned." Post to your Facebook page a note saying that you were cloned and not to accept any new Friend requests from you or click on links from you. Change your FB Password and make it stronger if you want.
4. What happens to Facebook when I die? If you set up a legacy contact now, then that person can memorialize your Facebook page and people will still see your posts and new post from your friends remembering you. Your legacy contact can manage these posts and delete if needed. You can also choose to have your FB

account deleted when you die. Go to: three lines for “more info”  
>Settings and Privacy>Settings>Account>Access and  
Control>Memorialization Settings>Choose Legacy Contact.
