Second Factor Inc (SFI) is looking for a SailPoint Engineer in Springfield, VA. This role is mostly remote, but the Engineer is expected to be on site promptly if there are any technical issues that will require their presence. Daily presence in the office is required for the first few weeks in order to get better acquainted and familiarize themselves with the organization.

Responsibilities:

Execute the duties and responsibilities as a senior member of the DOS ICAM operations team. Provide senior level engineering design and operations support to provide enterprise-level solutions using physical and virtual networking technologies, server hosting, and storage solutions. Provide white papers for technical systems solutions and incremental roadmaps. The systems architect will have daily interactions with government clients related to meeting technical requirements for Data Center and Overseas infrastructure initiatives. Domain knowledge and technical decision-making will have a critical impact on overall project implementation and execution.

Job Description:

- Architect, engineer, and deploy hosting solutions for ICAM systems (SailPoint & Radiant Logic) supporting 100K+ users.
- Work with customers to determine their functional needs.
- Translate customer needs into hardware/software requirements.
- Provide technical direction for project team throughout SDLC.
- Assist in the development of Enterprise policies and directives.
- Provide Tier III support to deployed systems.
- Participate in functional or user acceptance testing to ensure final product meets intent of customer's needs.
- Review and document functionality of existing legacy applications.
- Create technical specifications and white papers as required.
- Communicate regularly to government POC regarding project activities and status.
- Plan, research, evaluate and recommend new equipment and related technologies.
- Develop contingency plans for infrastructure related software/hardware failures including isolated and major outages.
- Must have excellent communication skills.

Job Requirements:

- Bachelor's degree in an information technology or related field and nine (9) years of experience; Master's degree or equivalent graduate degree and 7 years related experience in network management. May accept additional experience in lieu of degree.
- Experience designing, deploying and operating SailPoint based ICAM systems.
- Knowledge of Data Center Architecture's and designs for large scale Data Centers.
- Knowledge and experience with Large Scale Storage Area Network Systems (Design, Build, Operate).
- Knowledge and experience with VMware (Design, Build, Operate).
- Knowledge of Software Defined Data Center (SDDC) concepts and principles.
- Knowledge of Microsoft File Systems, Operating Systems and Applications.
- Knowledge and experience with Microsoft OS and Wintel systems.
- Systems Engineering background with understanding of Cloud Computing Reference Architecture.

Required Clearance

- US Citizenship
- Active Secret or Top-Secret Clearance

Desired Training & Skills

- Knowledge of Integrated Converged Stack infrastructure (i.e. VCE Vblock, FlexPod)
- Knowledge of IP Networking VPN's, switching, and routing
- OKTA certification
- Experience designing, deploying and operating Radiant Logic based ICAM systems

Clearance Requirement: SECRET (Active) with ability to obtain a TS

Job Type:

- Full-time

Benefits:

- 401(k)
- Dental and Vision insurance
- Health insurance
- Life insurance
- Paid time off

Position #0651-SailPoint Engineer.docx

Education & Experience:

- Bachelor's degree in an information technology or related field and nine (9) years of experience; Master's degree or equivalent graduate degree and 7 years related experience in network management. May accept additional experience in lieu of degree.

Work Location:

- Hybrid with the on-site location being in Springfield, VA. Employee will be required to come on-site as needed. Averaging 1-2 times per week.
