Project Management

Project management is the application of processes, methods, skills, knowledge and experience to achieve specific project objectives according to the project acceptance criteria within agreed parameters.

Our services specialize in planning, coordinating, and executing projects according to specific requirements and constraints.

We **perform** all of the activities related to project work, from conceptualization to completion including KPIs reported on a weekly basis to all pertinent parties

The **end goal** is to preserve the **design concept** while completing the project **on time** and **within budget**.

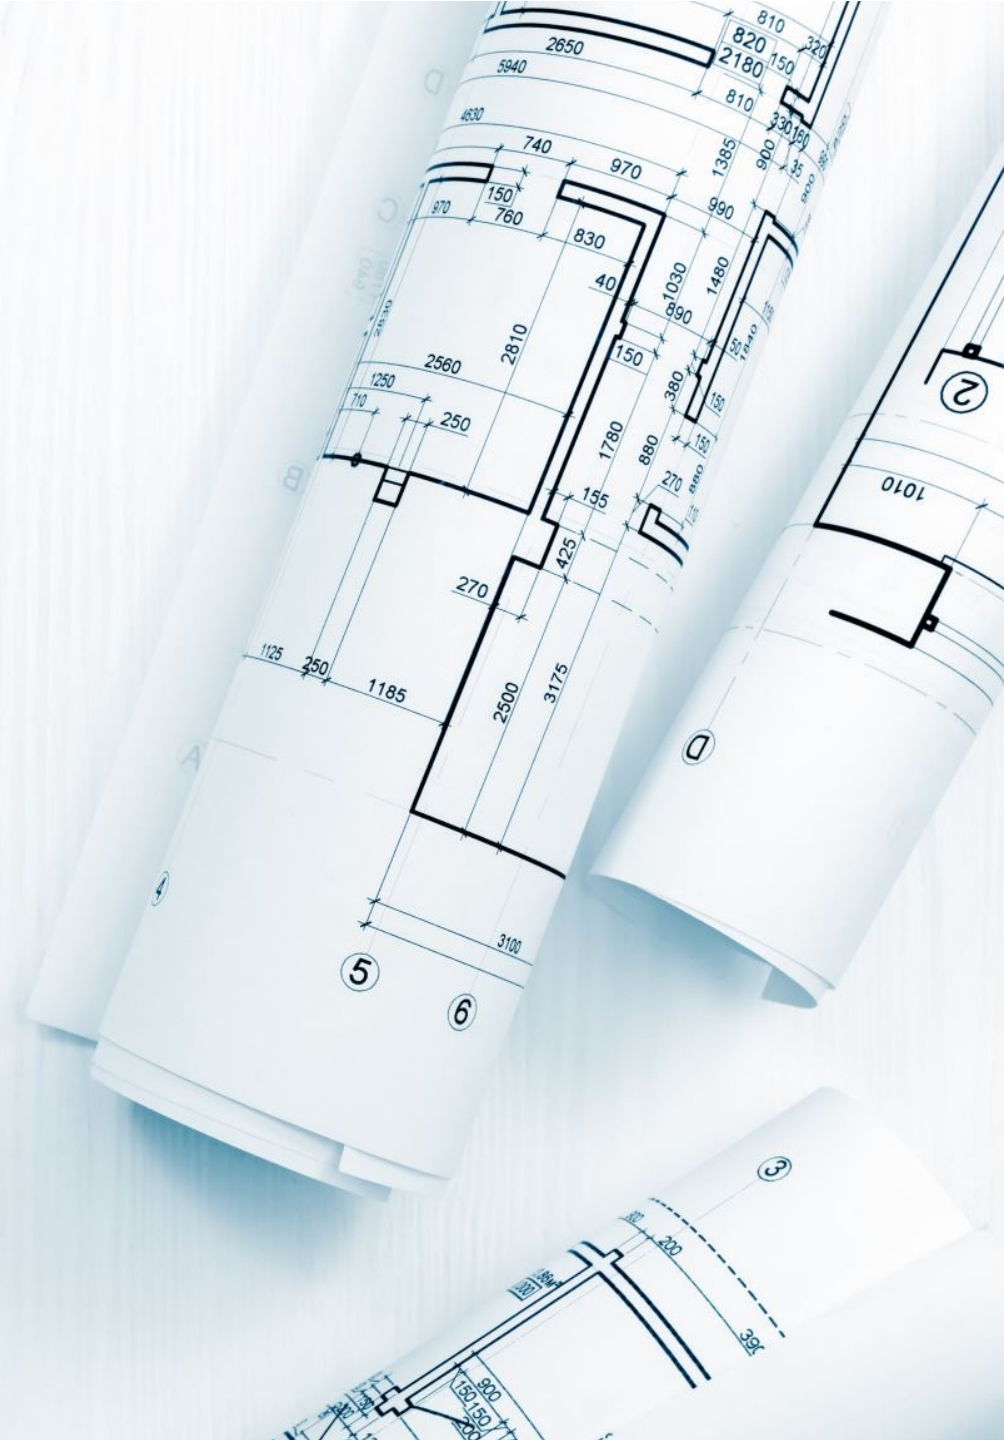

Quality Control

- Gunderson Consulting has strong Supply Chain partners to help reinforce the mutually agreed upon quality standards set in place per factory. Proactive management reduces QC issues before they are found at the end of the production line and/or delivered goods to customers.

Installation Management

- OSHA certified
- Union and Non-union crew options
- Fully licensed and insured
- Self-punch all our own installs
- All installers trained and certified in order to work GCI
- All installers have great bedside manner, in uniform with proper safety equipment
- Help engineer the solution(s) at time of measure with GC, GM and any other applicable trades
- Offer warehousing and/or on site receiving of all deliveries

A photograph of a red truck at a loading dock. The truck is on the left side of the frame, and its trailer extends towards the right. The background shows a loading dock area with a concrete floor, yellow and black safety railings, and some pipes. The scene is lit with a warm, golden light, suggesting either sunrise or sunset. A large, semi-transparent white circle is overlaid on the right side of the image, containing the title and a list of services.

Logistics Management

- Staff of expert Import/Export Specialists reducing cost and lead times
- National warehousing available for staging partial shipments and/or partial installations
- Competitive shipping costs
- Staff tracking every delivery
- Quality logistics requirements prior to shipping to assure smooth delivery (i.e. Lift gate, delivery appt, POC, road and facility truck access limitations)
- Manage freight claims when shipped via our freight forwarders
- Flexibility to allow 3rd party freight forwarders if preferred
