

# 2<sup>nd</sup> Balcony

*Keep Your Crews In-District, In-Service!*

Training Site: Spring, Texas

Training Site: Lone Star College, Kingwood, Texas

By adding the optional **2<sup>nd</sup> Balcony/Instructor's Platform**, not only do you create an additional vantage point for Instructors and Safety Officers to observe trainees, but you provide a realistic scenario creating a "stacked" apartment balcony.

Accessible from a 35' Ground Ladder, or Aerial Ladder, crews can practice exiting an Aerial Ladder, perform a rescue, stretch a hose line using ropes, and so much more!

**844-55-TOWER**
