

Outriggers

Keep Your Crews In-District, In-Service!

Not only do the Outriggers extend the footprint of the **Affordable Drill Tower** by 10' in each direction, and not only do the Outriggers provide even more stability to the Affordable Drill Tower, but the Outriggers add additional ground floor space for stretching hose lines and performing various fire ground drills. Enclose the ground level center corridor to create a nearly 40' long hallway which offers even more training opportunities!
