Area of rectangular field = length x width = 90×45

18. Ans D

Each side of the 3 cm triangle is broken into 3 equal parts. This means that each side of the smaller equilateral triangles are 1 cm each. Each triangle has 2 external exposed sides.

$6 \text{ triangles} \times 1 \text{ cm sides} \times 2 \text{ exposed sides} = 12 \text{ cm}$

20. Ans B

The inequality $23 < x < 32$ means x is more than 23 but less than 31. Hence x will be any number from 24 to 31 only.
