110 Volt or 220 Volt 

A revolution in linear grinding! Simply slide on the abrasives and they secure themselves automatically when the machine turns. Fast and easy!

Grinding in corners is easy – simply slide the abrasive wheel on the finned shaft, slightly towards the outside.

Even narrow abrasive wheels can be used and positioned freely on the finned shaft, no spacer rings required.

PTX Eco Smart Kits

PTX Professional Kit For Metalworking

Contains PTX machine and all of the abrasives you need for shadow-free, wave-free industrial finishes. Match or create any finish up to a mirror finish on metals. Cleaning products and preservatives are also included to prevent marks and fingerprints once the finish has been applied. **Part # 47004A**
