# Restaurant Connections

NETWORK MANAGEMENT & VISIBILITY | PCI COMPLIANT CONNECTIVITY

Acumera is a fully PCI compliant service provider with all applicable requirements and controls. We provide external vulnerability scanning, an attestation of scan compliance (AOSC), and an online tool to simplify the annual self-assessment requirement.

Acumera's Restaurant Connections service removes the complexity of network management and monitoring and increases POS and network uptime to secure your payments and keep them flowing.

Let Acumera protect your POS and entire network, so you can reduce non-compliance costs and focus on revenue-generation and growing your business.

PCI Compliance
- Level 1 PCI certified service provider and attestation of compliance
- Listed on both the Visa and Mastercard PCI compliant service provider registries
- PCI compliant payment gateway and processing
- Dynamically generated network diagrams
- Policy building and management

Network Management and Visibility with the AcuVigil™ Dashboard
- Monitoring of every location, every device, and every connection
- 24x7x365, proactive, US-based network support
- Cloud-based app catalog for analytics and to support IoT devices, loyalty programs, business management software, and more

Connectivity and Uptime
- Secure POS and payment gateway connectivity
- AcuLink™ PCI compliant remote access
- Centrally managed AutoVPN
- WAN failover that is carrier-agnostic
- Cellular WAN failover service available

Managed Security
- Managed firewall service
- Segmentation design and implementation
- Internal and external vulnerability scanning
- Logging and storage of network traffic data
- Intrusion detection, monitoring, and response
- Web content filtering for spam and malware control

At the heart of Acumera's solution is our Merchant Gateway, an advanced firewall and application platform. Our AcuVigil Dashboard adds unmatched visibility and provides a range of apps for management, monitoring and analytics. On top of that, we provide 24x7x365 proactive support and can identify and respond to problems before they are even discovered at the local store level.

AcuVigil™ Dashboard
Network visibility and management dashboard that gives you a single view into every store for monitoring and troubleshooting

Managed POS Firewall
Segments and protects your payment card environment from the rest of your network

24x7x365, Proactive, US-Based Network Support
Our network operations center (NOC) monitors your networks around the clock and provides proactive network troubleshooting and problem resolution

Network Security Management
Network security management for simple to complex networks

AcuLink™ Remote Access
AcuLink Remote Access connection apps are enabled in the AcuVigil Dashboard and comply with PCI-DSS requirements 12.3.8 and 12.3.9

Temperature Monitoring
Monitoring and alerts, plus access to historical data and printable HACCP logs

External Vulnerability Scanning
External vulnerability scanning by a certified ASV to meet PCI DSS requirement 11.2 and an attestation of scan compliance (AOSC)

Segmented WiFi
Cloud-configured plug-and-play, segmented WiFi with branded splash page

WAN Failover
Automatic backup network connectivity to prevent payment processing disruptions when your primary internet goes down

Optional Cellular WAN Failover Service
Modem, cellular data plan and flexible carrier options

VPN Connection Setup
Connects headquarters securely to your distributed locations to access critical business information (AutoVPN service not included)

Cloud-Based App Catalog
An extensive catalog of apps for monitoring, data intelligence and better systems uptime and profitability

⚓ Merchant Gateway and switch sold separately
